MANAGER'S COMMENTS

EQUITY MARKET REVIEW

The FBMKLCI (KLCI) ended the month of August on a dismal note after falling 0.28% to end at 1,866.11 point. It was another erratic month as the KLCI saw heavy selling pressure early in the month but slowly gained back most of the losses on the back of Wall Street's strength. The recently concluded Malaysia 2Q14 results season was weak with more downside surprises vs. upside expectations which will likely drag the earnings growth below the 5.0% level YoY. The broader market underperformed the KLCI as the FBM Emas fell 0.7% mom to 12,995pts. Small cap underperformed too as the FBM Small cap fell 2.4% to 18,605pts.

MARKET OUTLOOK

For the month of September, we are expecting another volatile trend for the KLCI as it has historically been the second worst performing month of the year, falling an average of 0.8% over the past 25 years. The KLCI nery trend will cap any upside movement at the 1,870-1,880 level (lowered from 1,880-1,890). We are also lowering our support level to 1,840-1,850 this month as there seems to be no catalyst to kick-start the negative year-to-date performance in September. The KLCI continues to be a big laggard YTD and we believe it is a matter of time before it starts to play a bit of catch up.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 August 2014, the Volatility Factor (VF) for this fund is 11.4 and is classified as "High". (source: Lipper) "High" includes funds with VF that are above 10.6 but not more than 13.0 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2014 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2014.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Replacement Master Prospectus dated 1 December 2013 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are stock market risk, individual stock risk, liquidity risk, issuer risk, interest rate risk, credit / default risk and shariah specific risk. These risks and other general risks are elaborated in the Master Prospectus.
