MANAGER'S COMMENTS**FUND REVIEW**

Kidsave's NAV/unit increased by 0.65%, outperforming its benchmark's (50% KLCI + 50% 12-month KLIBOR) loss of 0.05%. Since the month of July, the fund has taken proactive steps to re-allocate the country exposure to be more ASEAN-centric, with particular tilt towards Indonesia and Thailand

MARKET REVIEW

In Aug, S&P500 Index hit 2000pt mark for the first time, buoyed by investors optimism on gradual economy recovery in the US and ease of tension in Ukraine crisis that roiled the market in July and early Aug. Global financial markets rebounded to recoup lost ground while volatility remain a key risk. FBM KLCI eased marginally, -0.28% mom to 1866pt while YTD still recorded flattish return, fell -0.05%. In the meantime, Small Cap Index corrected after strong rally YTD and warnings from research houses on lofty valuation, underperform in July, -2.42% and +18.54% YTD, KLCI Fledgling Index +0.99% mom and +28.05% YTD. The KLCI lacklustre trend underperformed ASEAN regional markets but outperformed some of the North Asia peers. Within Asia region, India, Vietnam and Philippines were best performers, advanced circa +28%, +24% and 23% YTD respectively while Japan Nikkei 225 was worst performers, fell circa 3% YTD.

MARKET OUTLOOK AND STRATEGY

Despite lacklustre Aug performance on KLCI due defensive nature of the market and lack of positive catalyst but overall market breadth remain healthy, we maintain our positive view on equity market and envisage bottoming of corporate earnings downgrade and expect gradual recovery in 2H 2014.

On regional front, latest HSBC Markit China manufacturing PMI came in weaken to 50.2 in Aug vs 51.7 in July, while the non-manufacturing PMI recorded an increase to 54.1 in Aug from 50.0 in July. We envisage China macro data continue to be mixed with soft patch due to Chinese govt determination to rebalance the economy. We expect the Chinese govt will react with selective/targeted easing should cyclical weakness threaten GDP growth and unemployment. EM reliance on China growth for commodities export may face headwinds in 2014.

On sector basis, we continue to favour consumer, tech, healthcare, industrial and telco while selectively bullish bias on infra related construction stocks. We foresee 2014 to be a reform year for regional economies and Malaysia govt to rollout targeted infra projects to spearhead the economy and continue its reform agenda including subsidy rationalization which augur well for the economy. Increase market volatility globally will create capital misallocation and outflow of funds from emerging markets, thus misprice securities from fundamental. We remain cognizant of prevalent risks but look into adding bombed-out good fundamental stocks to enhance alpha.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 August 2014, the Volatility Factor (VF) for this fund is 5.5 and is classified as "Low". (source: Lipper) "Low" includes funds with VF that are above 1.1 but not more than 7.9 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2014 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2014.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 1 December 2013 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks for the Fund are interest rate risk and credit/default risk, equity investment risks such as market risk and particular security risk. These risks and other general risks are elaborated in the Master Prospectus.
