MARKET REVIEW

In Oct, financial markets volatility heightens on the back of investors concern on global growth after IMF downgrade global economic forecast, fear of Fed interest path acceleration and market liquidity. S&P500 Index fell circa 7% intra month before recover to closed +2.32% in Oct. Brent crude oil fell 28% since June to \$82/barrel intensify the October market selloff. FBM KLCI edged up marginally, +0.48% mom to 1855pt while YTD still recorded flattish return, fell -0.63%. In the meantime, Small Cap Index ended in negative territory after strong rally YTD and warnings from research houses on lofty valuation, fell 5.20% mom and +12.75% YTD, KLCI Fledgling Index decline 4.57% mom and +25.11% YTD. The KLCI lacklustre trend underperformed ASEAN regional markets but outperformed some of the North Asia peers. Within Asia region, India, Philippines and Thailand were best performers, advanced circa +31%, +22% and 21% YTD respectively while Kospi, HSCEI, and Nikkei 225 were underperformers, fell 2%, 0.56% and +0.75% YTD respectively. underperformers, fell 4%, 1% and 0.7% YTD respectively.

MARKET OUTLOOK AND STRATEGY

PM Najib budget announcement centred on govt efforts in fuel subsidy rationalization, infra projects rollout and impact of GST implementation in early 2015 to rein in fiscal deficit. We maintain our positive view on equity market and envisage bottoming of corporate earnings downgrade and expect gradual recovery in 2015.

On regional front, latest HSBC Markit China manufacturing PMI came in unchanged at 50.2 in Sept vs 50.2 in Aug and 51.7 in July, while the non-manufacturing PMI weaken slightly to 54.0 in Sept vs 54.4 in Aug. We envisage China macro data continue to be mixed with soft patch due to Chinese govt determination to rebalance the economy. We expect the Chinese govt will react with selective/targeted easing should cyclical weakness threaten GDP growth and unemployment. EM reliance on China growth for commodities export may face headwinds in 2014.

On sector basis, we continue to favour consumer, tech, healthcare, industrial and telco while selectively bullish bias on infra related construction stocks. We foresee 2014 to be a reform year for regional economies and Malaysia govt to rollout targeted infra projects to spearhead the economy and continue its reform agenda including subsidy rationalization which augur well for the economy. Increase market volatility globally will create capital misallocation and outflow of funds from emerging markets, thus misprice securities from fundamental. We remain cognizant of prevalent risks but look into adding bombed-out good fundamental stocks to enhance alpha.
