RHB-OSK US FOCUS EQUITY FUND (formerly known as OSK-UOB US FOCUS EQUITY FUND)

The Fund will invest in a target fund which aims to provide capital growth primarily through investment in equity securities of smaller and medium-sized US companies. Smaller and medium-sized US companies are considered companies which, at the time of purchase, form the bottom 40% by market capitalisation of the US market.

MANAGER'S COMMENTS**QUARTERLY PERFORMANCE COMMENT**

Equity markets rested in the first quarter after surging strongly in 2013 (table above). In an interesting development large cap outperformed small cap, but smid cap outperformed both.

Energy was the standout sector within our benchmark this quarter, returning 8.0%. Utilities (+7.4%) was the other notable outperformer. Health care (+4.3%) was also strong. Consumer discretionary, returning -0.8% was by far the weakest sector for the quarter and consumer staples also fell marginally, returning -0.1%. Health care is interesting in that at the end of February it had posted a two month return of 9.9% driven by soaring biotechnology stocks. However sentiment changed abruptly on the biotechs and they fell to earth in March (falling 10.9%).

In terms of market factors lowest beta quintile stocks led for the 3 months (+3.1%). The smallest quintile of market cap lagged, as did the largest market cap quintile so there was no clear market cap trend for the quarter.

The Schroder US SMID Cap Equity strategy outperformed the index modestly in Q1 before fees. Stock selection was positive, led by our work in technology, producer durables and consumer discretionary. Materials & processing was our weakest sector as our container and packaging stocks lagged in response to the weather driven slowdown early in the year. Cash detracted marginally, averaging 7.7% for the quarter with an impact of -21 basis points.

In terms of sector weightings our key sector overweights are in the technology and consumer discretionary sectors. Our largest underweight is in financials (driven by the large REIT industry weighting). Two other underweightings are worthy of note: energy and utilities.

A sampling of new holdings this quarter shows a range of activity. We initiated positions in Minerals Technologies Inc., EP Energy Corp. and Allison Transmission.

OUTLOOK

After one of the best years in the history of the Russell indices for small and smid cap a period of consolidation is certainly within the historic norm. We calculate that approximately 2/3 of the 2013 rise in the index was due to expanding valuations, and only 1/3 was from earnings growth. Despite Street optimism over 2014 earnings growth (currently projected to be 17%) we feel that low double digits is a more likely outcome for earnings. We also have concerns about the high valuation levels (admittedly in a low interest rate environment) and feel there is likely to be some multiple contraction this year. We still are looking for a positive year in US equities, but nothing resembling last year's extraordinary returns.

The US economic recovery continues at a moderate pace. We find areas of interest in autos (and some other manufacturing), home construction (we are moderately positive, believing there is precedent for a lengthy recovery in this space) and selectively in some areas of health care. Energy remains an interesting story for the US as well.

As we have noted in other commentaries a key factor will be interest rates and the actions of the Federal Reserve Bank. To date, Chairwoman Yellen has indicated the intention to keep short term interests low (zero interest rate policy) while gradually tapering purchases in the long end of the curve. If things proceed in line with market expectations we do not anticipate any dislocations. The key word is "if". Should there be an unexpected rise in rates we would expect a rapid market response. Unexpected and/or sharp spikes in rates this will be negative for equities.

DISCLAIMER:

Based on the fund's portfolio returns as at 14 March 2014, the Volatility Factor (VF) for this fund is 13.6 and is classified as "Very High". (source: Lipper) "Very High" includes funds with VF that are above 13.1 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2013 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2014.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 1 December 2013 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are management risk and foreign investment risks such as currency risk and country risk and the specific risks of the target fund are general risks, investment objective risk, regulatory risk, risk of suspension of share dealings, liquidity risk, financial derivative instrument risk, warrants risk, counterparty risk, custody risk, smaller companies risk, initial public offerings risk, emerging and less developed markets securities risk, specific risks linked to securities lending and repurchase transactions and potential conflict of interest risk.
