MANAGER'S COMMENTS

MARKET REVIEW

August 2014 was another nervy month for the FBMKLCI, which witnessed selling pressure early of the month but slowly clawed back its losses thereafter on the back of gains in the U.S. The quarterly results season was again uninspiring as expected, with more misses compared to beats, whilst most companies reported in-line results. Penny stocks were in vogue during the month and experienced high volume, but mid and small cap stocks experienced selective profit taking, where the FBM Small Cap Index fell -2.4% in August. For the month, the FBMKLCI ended down -0.28% to close at 1,866.11 points.

On the domestic economic front, exports slowed down due to a sequential pullback in most major markets whilst imports slowed, which resulted in a narrowing trade surplus. Industrial Production rose again in June to 7.0% YoY (May 5.9% YoY), and the current account surplus narrowed to 6.1% of GDP. The stellar 6.4% 2Q2014 GDP growth figure (1Q2014 6.2%) was mainly led by the widening of net exports and a pickup in private investments. Meanwhile, inflation was contained with the CPI at 3.2% YoY in July (June 3.3%), moderately lower than the overnight policy rate ("OPR") that was revised to 3.25% in July.

In the bond market, investors took some profit ahead of the next Monetary Policy Committee ("MPC") meeting on 18th September, as there are still chances that Bank Negara may go for another rate hike. As a result, benchmark yields moved slightly higher compared to end-July levels. Corporate bond trading volume continued to surge in August with RM575mil of daily trades compared to RM550mil in July.

MARKET OUTLOOK

Global economic growth is ticking up, thanks to the various Quantitative easing (QE), accommodative and supportive packages by major world economies over the past few years. Despite hiccups along the way, there have been improvements in employment levels, business and consumer confidence, and industrial and manufacturing activities globally. With the U.S. poised to taper off completely its massive QE pumping before the end of 2014 and start guiding on its current ultra-low interest rates, markets will continue to adjust to this transition from liquidity-driven to a more fundamental and growth-driven focus.

Malaysia is expected to grow between 4.5%-5.5% in 2014, likely nearer the upper band and higher than the 4.7% registered for 2013 and supported by a better global economy and investment spending. Inflation will be higher at 3.0%-4.0% from increased fuel and electricity costs and expectations of more reduction in subsidies moving forward and expected inflationary expectations prior to GST implementation. All eyes will be on BNM especially for the September MPC meeting on whether the OPR rate of 3.25% since the 25bps hike in July may stay flat for the rest of the year. Fiscal restraints including those which were introduced by Prime Minister Dato' Seri Najib during the tabling of Budget 2014 are expected to continue.

Equities still look favourable as an asset class backed by corporate earnings growth, a conducive economic environment and a more stable fiscal plan. For fixed income, preference for corporate bonds is maintained, providing a steady income stream. Asset allocation (in-line with asset allocation limits) will be pro-actively managed with market movements to optimize investment returns.

DISCLAIMER:

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of The Disclosure Document in relation to the RHB Retirement Series dated 18 December 2012 and its supplementary(ies)(if any) ("Disclosure Document"), before investing. The disclosure document has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Disclosure Document relates will only be made on receipt of a form of application referred to in the Disclosure Document. For more details, please call 1-800-88-3175 for a copy of the PHS and the Disclosure Document or collect one from any of our branches or authorised distributors. The Manager wishes to highlight the specific risks of the Fund are equity risk, credit risk, interest rate risk, liquidity risk and income distribution risk. These risks and other general risks are elaborated in the Disclosure Document. This factsheet is prepared for information purposes only. It does not have regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive it. Past performance is not necessarily a guide to future performance. Returns may vary from year to year.
