**RHB RETIREMENT SERIES - GROWTH FUND**

This Fund aims to seek to provide capital growth.

**MANAGER'S COMMENTS**

**MARKET REVIEW**

Global equity markets experienced a very volatile October 2014, a month of two halves. The first half experienced a sharp fall plagued by the concerns from September, including the global growth slowdown fears especially in Europe, fears of the spread of Ebola, oil prices falling, tensions in Iraq and Ukraine, and uncertainties of when the U.S. Fed will begin its interest rate hikes. Budget 2015 for Malaysia was without surprises. Accelerated selling pressures brought the FBMKLCI to touch an intra-day low of 1,766 points before bargain hunting activities strengthened, coinciding with more encouraging data that the global economic data was not as bad as feared and boosted by Japan's surprise stimulus plan on the last day of the month. The local index managed to recoup all its earlier losses and close a volatile month at 1,855.15 points, up 9 points or +0.48% for the month of October.

On the domestic economic front, August trade surplus expanded less than expectation as imports outpaced exports. August Industrial Production surprised on the upside, at 6.50% YoY. Budget 2015 announced on 10th October further emphasized on meeting the country's fiscal deficit target in 2014 (3.50% of GDP) and 2015 (3.00% of GDP), by gradually removing fuel subsidies as well as the implementation of Goods and Services Tax ("GST") in April 2015. During the International Monetary Fund (IMF)'s annual meeting in Washington, Bank Negara Malaysia (BNM) Governor Dr. Zeti commented that Malaysia still needs an accommodative interest rate policy to support the country's growth, while noting that risks to global growth have increased. While the implementation of GST will likely increase inflation in the short-term, BNM still sees the long-term inflation trend of 3.00% as achievable. Both her comments and the temporary fall in September CPI to 2.60% YoY (August: 3.30% YoY) reinforces a rate hike pause for the time being. The local government bond market bullish flattened with long-end yields compressed more than short-end yields.

**MARKET OUTLOOK**

Global economic growth is ticking up, thanks to the various Quantitative easing (QE), accommodative and supportive packages by major world economies over the past few years. Despite hiccups along the way, there have been improvements in employment levels, business and consumer confidence, and industrial and manufacturing activities globally. With the U.S. ending its massive QE pumping, markets will now be expecting more guidance on when the current ultra-low interest rates will start to move up. Europe and Japan, however, are still undergoing their own easing measures to boost growth. Markets will continue to adjust to this transition from liquidity-driven to a more fundamental and growth-driven focus.

Malaysia is expected to grow between 4.5%-5.5% in 2014, likely nearer the upper band and higher than the 4.7% registered for 2013 and supported by a better global economy and investment spending. Inflation will be higher at 3.0%-4.0% from increased fuel and electricity costs and expectations of more reduction in subsidies moving forward and expected inflationary expectations prior to GST implementation. BNM will be maintaining its 3.25% OPR level for the rest of 2014 after the hike in July, while the government's fiscal restraints are expected to continue.

Equities still look favourable as an asset class backed by corporate earnings growth, a conducive economic environment and a more stable fiscal plan. For fixed income, preference for corporate bonds is maintained, providing a steady income stream. Asset allocation (in-line with asset allocation limits) will be pro-actively managed with market movements to optimize investment returns.

**DISCLAIMER:**

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of The Disclosure Document in relation to the RHB Retirement Series dated 18 December 2012 and its supplementary(ies)(if any) ("Disclosure Document"), before investing. The disclosure document has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Disclosure Document relates will only be made on receipt of a form of application referred to in the Disclosure Document.
