PRODUCT HIGHLIGHTS SHEET

This Product Highlights Sheet only highlights the key features and risks of RHB Big Cap China Enterprise Fund. Investors are advised to request, read and understand the Fund’s prevailing prospectus and its supplementary(ies) (if any) before deciding to invest.

Name of Fund	RHB Big Cap China Enterprise Fund (“Fund”).	Fund Category	Equity fund.
Manager	RHB Asset Management Sdn Bhd.	Launch Date	3 December 2007.
Trustee	HSBC (Malaysia) Trustee Berhad.	Financial Year End	31 December.

PRODUCT SUITABILITY

This Fund is suitable for investors who:

- (i) wish to participate in the potential of the fast-growing China economy; and
- (ii) are willing to accept higher risk in their investments in order to achieve long term* capital growth.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

This Fund aims to achieve long term* capital appreciation through investments in securities of companies with high growth potential.

*Note: “long term” in this context refers to a period of between 5 - 7 years.

INVESTMENT STRATEGY

This Fund will seek to achieve its investment objective through a diversified portfolio of equities and equity-linked securities issued by companies whose businesses are in the People’s Republic of China (“China”).

The Fund’s direct investments in China are those of companies whose securities are listed on the Hong Kong, Shanghai and Shenzhen Stock Exchanges, including China companies that are listed in other non China markets such as the US, London and Singapore Stock Exchanges. These are companies that have at least 50% of its business operations located in China and/or have at least 50% of its revenues derived from China. The Fund’s investments will also include collective investment schemes domiciled in Singapore, Luxembourg, Hong Kong, United Kingdom and US investing primarily in the China markets. The Fund’s direct investment in the equities and equity-linked securities issued by companies whose businesses are in China are those companies with a market capitalisation of at least USD 1 billion. Hence, the Fund’s name ‘Big Cap’. The restriction on the market capitalisation is determined at the point of purchase. The Fund’s direct investments are not sector specific and can invest in a broad range of sectors and industries. It seeks to add value by investing in a selective range of opportunities identified by the Manager as having a strong attraction based on company fundamentals.

In managing the Fund, the Manager will employ a multi-step investment process, combining a bottom-up investment process that involves rigorous company research with a top-down process to review asset allocation at the sector levels. Sector allocation is derived after analysing macro-economic trends and country dynamics. Sector exposure limits are in place to mitigate the risks of the investments. The Manager believe long-term investment performance can be achieved by employing a rigorous research process that enables them to identify sound and profitable companies that generate superior returns as well as by identifying companies that are undervalued.

This Fund’s portfolio will be structured as follows:

Up to 98% of Net Asset Value (“NAV”) - Investments in equities and equity-linked securities issued by companies whose businesses are in China and are listed on the China markets and/or other markets.

2% - 5% of NAV - Investments in liquid assets including money market instruments and deposits with financial institutions.

Subject to the range stipulated above, the asset allocation will be reviewed from time to time depending on the judgment of the Manager as to the general market and economic conditions. Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities.

The risk management strategies and techniques employed by the Manager include diversification of the Fund’s investments in terms of its exposure to various industries, sectors and asset classes and/or type of investments (i.e. equity, fixed income securities and money market instruments). Financial derivatives may also be used for hedging purposes where appropriate. Generally, the assets of the Fund will be invested over a medium to long term period with disposal of the investments when necessary to control risk as well as to optimise capital gains. This is especially so when the full growth potential of the investment is deemed to have been reduced over a prolonged rise in equity values and the other available investments may present cheaper valuations and potential higher returns. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission Malaysia. Adherence to the permitted investment and restrictions also helps the Manager to risk-manage the Fund’s portfolio in terms of diversification. Moreover, the Manager in making their investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the deed of the Fund.

For investments in foreign markets, the Manager in managing the principal risks such as country risk and currency risk will always take into

consideration its evaluation of the historical developments and its prior experience in such markets. Such practice will be managed through active management and constant review, drawing on its resources and infrastructure as an established global fund manager. Investments will ultimately be made based on risk-reward.

The Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse economic, political or any other market conditions. In such circumstances, the Manager may reallocate up to 100% of the Fund's equity investments into other asset classes such as fixed income securities, money market instruments and deposits with financial institutions, which are defensive in nature. These are deposits that are not embedded with or linked to financial derivative instruments (structured deposits) and (where applicable) these are current accounts, short term money market deposits and short term deposits with financial institutions.

MSCI China Index (RM).

DISTRIBUTION

DISTRIBUTION MODE - Distributions, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units of the Fund based on the NAV per unit as at the first Business Day when units in the Fund are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter.

DISTRIBUTION POLICY - Consistent with the Fund's objective which aims to achieve long term* capital appreciation, distributions will therefore be of secondary importance. Distributions, if any, after deduction of taxation and expenses will be reinvested.

*Note: "long term" in this context refers to a period of between 5 - 7 years.

KEY RISKS

As this Fund's equities investments will focus on securities issued by companies whose business are in China, it may be subject to a higher level of risk than an equities portfolio which is not restricted to a particular geographical market. Thus, there is a risk that the Fund will perform poorly during an economic downturn or in the event of adverse news affecting the said market. Further when investing in the China markets, prior approvals are required before investments can be undertaken in these countries. As such, the Fund has obtained from the relevant regulatory authority an investor code for investments in the China markets.

As this Fund may invest up to 98% of its NAV in foreign markets, it may be subject to further risks, such as currency risk and country risk.

CURRENCY RISK - Where a percentage of the value of the Fund is invested in foreign currency or assets denominated in a foreign currency, the Fund may be exposed to currency risk. Fluctuation in foreign exchange rates will affect the value of the Fund's foreign investments when converted into local currency and subsequently the value of the investments of unit holders of the Fund ("Unit Holder(s)"). This risk can be mitigated by investing in a wide range of foreign currency denominated asset thus diversifying the risk of single currency exposure. Hedging may be applied to mitigate the currency risk, if necessary.

COUNTRY RISK - In addition to currency risk, the Fund is also subject to country risk. The value of the assets of the Fund may also be affected by the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund may invest. Further, when investing in foreign markets, there are countries which may require prior approvals before investments can take place. For example, if and when the Fund invests in countries such as China, Taiwan, South Korea, India and Vietnam, such countries require the application of an investment licence or registration of an investor code before any investment can be made in these countries. As such, if investments in such countries are undertaken, there may be a risk that such registration or licence may be revoked or not renewed by the relevant authority and the Fund's investment in these countries may be affected. The effect on the Fund's investments will depend on the regulatory requirements of the respective countries. For example, if a foreign market requires the Fund to obtain an investment licence which is subject to renewal and if such investment licence is not renewed in a timely manner, this may result in the Fund's investment account in that country being frozen by the regulator resulting in investment activities for the Fund in that country being suspended. To mitigate this, the Manager will monitor closely the adherence of investment regulatory requirements in such countries. Furthermore, share investments are susceptible to the movements of share prices which can rise or fall for a number of reasons such as industry trends, economic factors, changes in a company's operations, management and financial performance as well as market perception of that particular company.

Other risks associated with investments in equities are as elaborated below:

MARKET RISK - Market risk is a risk that arises when the prices of investments in the marketplace are affected by circumstances such as political or economic events. These circumstances, which may be a local or global event can affect the markets where the Fund is invested in and subsequently the value of the Fund's investments.

PARTICULAR SECURITY RISK - The fluctuation in the performance of each individual security that the Fund invests in will affect the price of the units of the Fund. Not all companies issuing these securities are successful. The success or failure of the companies will cause its securities value to rise or fall. Valued collectively, the performance of individual securities comprising the Fund's portfolio will cause the unit price of the Fund to rise or fall accordingly.

VALUATIONS AND EXITING FROM INVESTMENT

VALUATION OF ASSETS

The Fund must be valued at least once every Business Day. However, certain foreign markets in which the Fund may invest in have different time zones from that of Malaysia. Accordingly, the valuation of the Fund for a Business Day will be conducted before 5:00 p.m. on the following day in which the Manager is open for business, when the closing prices of the foreign markets for that Business Day would be available. As such, the daily price of the Fund for a particular Business Day will not be published in the newspapers on the next day but will instead be published the next following day (i.e. the price will be two (2) days old). This will be specifically indicated in the newspapers. Investors may however obtain the most current computed price by contacting the Manager directly or visiting our website, www.rhbgroup.com.

EXITING FROM THIS INVESTMENT

Units of the Fund can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered office or any of its branch offices, or to any of its authorised sales agents or participating IUTAs before their respective cut-off times. The redemption monies will be paid within ten (10) days after receipt by the Manager of the request to repurchase. For partial redemption, the balance of units of the Fund held after the redemption must be at least one hundred (100) units or such other quantity as the Manager may from time to time decide (the "minimum investment balance"). There are no restrictions on the number of units a Unit Holder can redeem out of his investments or the frequency of redemptions in a year. However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than the minimum investment balance. For EPF Unit Holders, the repurchase proceeds will be remitted to EPF by crediting into the members' provident account.
