PRODUCT HIGHLIGHTS SHEET

This Product Highlights Sheet only highlights the key features and risks of RHB KidSave Trust. Investors are advised to request, read and understand the Fund’s prevailing prospectus and its supplementary(ies) (if any) before deciding to invest.

Name of Fund	RHB KidSave Trust (“Fund”).	Fund Category	Balanced fund.
Manager	RHB Asset Management Sdn Bhd.	Launch Date	10 May 1999.
Trustee	HSBC (Malaysia) Trustee Berhad.	Financial Year End	31 March.

PRODUCT SUITABILITY

This Fund is suitable for investors who are willing to accept moderate risk in their investments in order to achieve long term* capital growth and income.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

This Fund aims to maximise total returns through a combination of long term* growth of capital and current income[^] consistent with the preservation of capital[#].

Note: * “long term” in this context refers to a period of between 5 – 7 years. [^] The income is in the form of units. Please refer to the Fund’s distribution mode. [#] Although the Fund aims to preserve its value, the Fund is not a capital guaranteed fund or a capital protected fund.

INVESTMENT STRATEGY

This Fund seeks to achieve its investment objective through a policy of diversified investment in equities and fixed income securities (comprising amongst others of convertible debt securities, redeemable debt securities, bonds/securities that are issued and/or guaranteed by the government or quasi-government agencies, corporate bonds carrying at least BBB ratings by RAM Rating Services Berhad or its equivalent rating by any other rating establishment and fixed income collective investment schemes), money market instruments, cash and deposits with financial institutions. This Fund will generally adopt a 50% equities and 50% fixed income securities asset allocation strategy. Given this balanced asset mix, the fixed income portion of the Fund’s portfolio could provide a buffer to mitigate the adverse effect on the Fund’s portfolio arising from volatile price movements in the stock market whilst the equity portion of the Fund would enable the Fund to enjoy part of the appreciation from growth in the stock market. However, the actual percentage of assets invested in equities and fixed income securities will vary from time to time, depending on the judgement of the Manager as to the general market and economic conditions, trends and yields, interest rates and changes in fiscal and monetary policies. In reviewing this asset allocation strategy, the Fund’s asset mix would normally range from 40% to 60% in equities and from 40% to 60% in fixed income securities to reflect the market conditions but subject always to a minimum allocation of 40% in equities and 40% in fixed income securities. Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities. For investments in foreign markets, the Manager in managing the principal risks such as country risk and currency risk will always take into consideration its evaluation of the historical developments and its prior experience in such markets. Such practice will be managed through active management and constant review of the economic and political developments of the countries invested. Investments will ultimately be made based on risk-reward. The risk management strategies and techniques employed by the Manager include diversification of the Fund’s investments in terms of its exposure to various industries, sectors and asset classes and/or type of investments (i.e. equity, fixed income, money market instruments). Financial derivatives may also be used for hedging purposes where appropriate. Generally, the assets of the Fund will be invested over a medium to long term period with disposal of the investments when necessary to control risk as well as to optimise capital gains. This is especially so when the full growth potential of an investment is deemed to have been reduced over a prolonged rise in market value and other available investments may present cheaper valuations and potential higher returns. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission. Adherence to the permitted investments and restrictions also helps the Manager to risk-manage the Fund’s portfolio in terms of diversification. Moreover, the Manager in making its investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the deed of the Fund. The Manager may take temporary defensive positions that may be inconsistent with the Fund’s principal strategy in attempting to respond to adverse economic, political or any other market conditions. In such circumstances, the Manager may reallocate the Fund’s equity investments into other asset classes such as fixed income securities, money market instruments and deposits with any financial institutions, which are defensive in nature. These are deposits that are not embedded with or linked to financial derivative instruments (structured deposits) and (where applicable) these are current accounts, short term money market deposits and short term deposits with financial institutions. In its reallocation, the level of equity investments would not fall below 20% of the Net Asset Value (“NAV”).

DISTRIBUTION

DISTRIBUTION POLICY - Consistent with the Fund's objective of long term* growth of capital and current income[^], the Fund will distribute a substantial portion of its returns to unit holders of the Fund ("Unit Holder(s)"). Distributions, if any, after deduction of taxation and expenses, are generally declared annually and will be reinvested.

Note: *"long term" in this context refers to a period of between 5 – 7 years.

[^]The income is in the form of units. Please refer to the Fund's distribution mode.

DISTRIBUTION MODE - Distribution, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units of the Fund based on the NAV per unit as at the first Business Day when units in the Fund are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter.

KEY RISKS

MARKET RISK - Market risk is a risk that arises when the prices of investments in the marketplace are affected by circumstances such as political or economic events. These circumstances, which may be a local or global event can affect the markets where the Fund is invested in or global markets and subsequently the value of the Fund's investments.

PARTICULAR SECURITIES RISK - The fluctuation in the performance of each individual security that the Fund invests in will affect the price of the units of the Fund. Not all companies issuing these securities are successful. The success or failure of the companies will cause its securities value to rise or fall. Valued collectively, the performance of individual securities will cause the Fund's unit price to rise or fall accordingly.

INTEREST RATE RISK - Prices of fixed income securities and debentures generally move in opposite direction with interest rates. When interest rates rise, prices of fixed income securities and debentures will generally fall. This rise in interest rates will cause the investor to face the risk of capital loss. However, when interest rates fall, prices of fixed income securities and debentures will generally increase, thus investors will see capital gains.

CREDIT / DEFAULT RISK - This refers to the creditworthiness of the fixed income securities and debentures issuer and its expected ability to repay debt. Default happens when the issuer is not able to make timely coupon payments and/or repay or pay the principal in a timely manner thus lowering the value of the Fund's investments and subsequently the value of Unit Holders' investments.

As this Fund may invest up to 30% of its NAV in foreign markets, it may be subject to further risks, such as currency risk and country risk, when compared to a portfolio which concentrates its holdings in a single market or economy.

VALUATIONS AND EXITING FROM INVESTMENT

VALUATION OF ASSETS

The Fund must be valued at least once every Business Day. However, certain foreign markets in which the Fund may invest in have different time zones from that of Malaysia.

The valuation of the Fund for a Business Day will be conducted before 5:00 p.m. on the following day in which the Manager is open for business, when the closing prices of the foreign markets for that Business Day would be available.

As such, the daily price of the Fund for a particular Business Day will not be published in the major newspapers on the next day but will instead be published the next following day (i.e. price will be two (2) days old). This will be specifically indicated in the major newspapers.

Investors may obtain the most current computed price by contacting the Manager directly or visiting our website, www.rhbgroup.com.

EXITING FROM THIS INVESTMENT

Units of the Fund can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered/principal office or any of its branch offices, or to any of its participating IUTAs or to any other authorised distributors before their respective cut-off times.

The redemption monies will be paid within ten (10) days after receipt by the Manager of the request to repurchase.

For partial redemption, the balance of units held after the redemption must be at least one hundred (100) units or such other lower quantity as the Manager may from time to time decide (the "minimum investment balance"). There are no restrictions on the number of units a Unit Holder can redeem out of his investments or the frequency of redemptions in a year. However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than the minimum investment balance.

For EPF Unit Holders, the repurchase proceeds will be remitted to EPF by crediting into the members' provident account.
