PRODUCT HIGHLIGHTS SHEET

This Product Highlights Sheet only highlights the key features and risks of RHB ASEAN Fund. Investors are advised to request, read and understand the Fund’s prevailing prospectus and its supplementary(ies) (if any) before deciding to invest.

Name of Fund	RHB ASEAN Fund (“Fund”).	Fund Category	Equity fund.
Manager	RHB Asset Management Sdn Bhd.	Launch Date	2 December 2009.
Trustee	HSBC (Malaysia) Trustee Berhad.	Financial Year End	30 April.

PRODUCT SUITABILITY

This Fund is suitable for investors who:

- (i) wish to participate in the potential and investment opportunities of the fast growing ASEAN economies; and
- (ii) are willing to accept higher risk in their investments in order to achieve medium to long term* capital growth.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

This Fund aims to achieve medium to long term* capital appreciation through investments in securities of companies with high growth potential.

*Note: “medium to long term” in this context refers to a period of between 3 - 7 years.

INVESTMENT STRATEGY

The Fund seeks to achieve its investment objective by investing primarily[^] in the securities of companies that are expected to benefit from the on-going development and growth of the ASEAN region (i.e. Malaysia, Singapore, Thailand, Philippines, Indonesia, Vietnam, Myanmar, Cambodia, Laos and Brunei) and opportunistically[^] from the on-going development and growth in Asia (i.e. India, China, Hong Kong, Korea, Taiwan and Japan). In managing the Fund, the Manager will seek out companies that are exposed to the key development and growth trends that the Manager identifies as drivers of business and security markets performance. The Manager expects that security market investment themes will evolve over time influenced by the on-going growth and development cycles and investor sentiment for the ASEAN region and in Asia. The Manager will use proprietary and/or secondary, fundamental research to identify the main economic and social trends expected to drive company profitability and security markets performance over the next 2 – 3 year time horizon and will invest in a diversified portfolio of the securities of such companies that are expected to benefit most from those themes and trends. Over time, the main themes that influence the performance of ASEAN and Asian capital markets will likely change, reflecting the dynamic underlying economic and social development across the region and within individual countries. Themes may vary based on underlying economic development such as energy, transportation and communication infrastructure investment and intra-regional trade; social development such as rising middle class consumption and private savings accumulation and investment; capital market development such as privatisation; and investor themes such as high yield corporate bonds. The Manager will use proprietary and/or secondary research and in-house regional expertise to identify the development of these themes. The Manager will actively manage the securities in the portfolio and the portfolio construction will be based on the themes identified to maximise the benefit for the portfolio. By adopting an active management approach to security selection and portfolio construction, whereby the portfolio underlying stocks, sector and country exposures will change depending on the themes that the Manager thinks are relevant, the portfolio is expected to be “evergreen” benefiting over time from multiple investment themes. The Fund will focus on a minimum of three (3) themes at any one time from the evolving ASEAN and Asian trends identified by the Manager as having strong potential to outperform the benchmark, MSCI South East Asia Index (RM). In managing the Fund, the Manager will employ a multi-step investment process, combining a bottom-up investment process that involves rigorous company research with a top-down process to review asset allocation at both the regional/country and sector levels. Asset allocation and geographical weightings are derived after analysing macro economic trends and country dynamics. Country and portfolio exposure limits are in place to mitigate the risks of the investments. The Manager believes long term investment performance can be achieved by employing a rigorous research process that enables them to identify companies that have the potential to generate returns that are above the country’s or sector’s average returns as well as by identifying companies that are undervalued.

In constructing the Fund’s portfolio, the Manager will invest in securities issued by companies listed on or traded in the ASEAN and Asian markets such as Malaysia, Singapore, Thailand, Philippines, Indonesia, Vietnam, India, China, Hong Kong, South Korea, Taiwan and Japan. From time to time the Manager may also invest in securities of ASEAN and Asian companies that are listed on or traded in the markets of other countries (i.e. US, United Kingdom and Australia) where the Manager believes those companies will benefit from the main investment themes that have been identified in the course of its proprietary and/or secondary research and investment analysis. The Fund’s investments in the companies that are listed on or traded in these other countries will be limited to companies that have at least 50% of its revenues derived from countries in ASEAN and Asia and/or have at least 50% of its business operations located in these countries as determined at the point of purchase of such securities. The Fund’s investments will also include collective investment schemes investing primarily in the ASEAN and Asia countries. The Fund will generally have an exposure of 70% to 98% of Net Asset Value (“NAV”) in equity and equity related securities (such as warrants) to generate returns to the Fund. However, the Manager may lower the equity exposure of the Fund in favour of fixed income

securities such as government and semi-government bonds, corporate debt securities and money market instruments in order to help reduce the risk of loss to capital. Accordingly, the Fund's exposure to fixed income securities may increase up to 30% of NAV. The Fund's investment in fixed income securities are those with a minimum rating of BBB (for long term fixed income securities) or P1 (for short term fixed income securities) by RAM Rating Services Berhad ("RAM") or the equivalent rating by a global rating agency such as Standard & Poor's, Fitch Ratings or Moody's Investors Service. The Fund may also invest in fixed income securities which are unrated. However, when investing in such unrated fixed income securities, the Manager will rely greatly on its own credit analysis of the issuer and/or the securities.

This Fund's portfolio will be structured as follows:

70% to 98% of NAV - Investments in equities and equity related securities (such as warrants).

Up to 30% of NAV - Investments in fixed income securities such as government and semi-government bonds, corporate debt securities and money market instruments.

2% - 5% of NAV - Investments in liquid assets including money market instruments and deposits with financial institutions.

Subject to the range stipulated above, the above asset allocation will be reviewed from time to time depending on the judgment of the Manager as to the general market and economic conditions. Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities. The risk management strategies and techniques employed by the Manager include diversification of the Fund's investments in terms of its exposure to various industries, sectors, countries and asset classes and/or type of investments (i.e. equity, fixed income securities and money market instruments). Financial derivatives may also be used for hedging purposes where appropriate. Generally, the assets of the Fund will be invested over a medium to long term* period with disposal of the investments when necessary to control risk as well as to optimise capital gains. This is especially so when the full growth potential of an investment is deemed to have been reduced over a prolonged rise in equity values and the other available investments may present cheaper valuations and potential higher returns. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission. Adherence to the permitted investments and restrictions also helps the Manager to risk-manage the Fund's portfolio in terms of diversification. Moreover, the Manager in making its investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the deed of the Fund.

*Note: "medium to long term" in this context refers to a period of between 3 – 7 years.

For investments in foreign markets, the Manager in managing the principal risks such as country risk and currency risk will always take into consideration the reference benchmark as well as its evaluation of the historical developments and its prior experience in such markets. Such practice will be managed through active management and constant review of the economic and political developments of the countries invested. Investments will ultimately be made based on risk-reward. The Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse economic, political or any other market conditions. In such circumstances, the Manager may reallocate up to 100% of the Fund's equity investments into other asset classes such as fixed income securities, money market instruments and deposits with financial institutions, which are defensive in nature. These are deposits that are not embedded with or linked to financial derivative instruments (structured deposits) and (where applicable) these are current accounts, short term money market deposits and short term deposits with financial institutions.

Explanatory notes: "primarily" refers to at least 70% of NAV and "opportunistically" means investing up to 30% of NAV in the securities of companies which are exposed to the investment themes identified by the Manager that influence the performance of the Asian capital markets.

BENCHMARK

MSCI South East Asia Index (RM).

DISTRIBUTION

DISTRIBUTION MODE - Distributions, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units of the Fund based on the NAV per unit as at the first Business Day when units in the Fund are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter.

DISTRIBUTION POLICY - Consistent with the Fund's objective which aims to achieve medium to long term* capital appreciation, distributions will therefore be of secondary importance. Distributions, if any, will be reinvested after deduction of taxation, if any, and expenses.

KEY RISKS

As this Fund's investments will focus on securities issued by companies whose businesses are in ASEAN countries, it may be subject to a higher level of risk than an equities portfolio which is not restricted to a particular geographical region/market. Thus, there is a risk that the Fund will perform poorly during an economic downturn or in the event of adverse news affecting the said region/market. As this Fund may invest up to 98% of its NAV in foreign markets, it may be subject to further risks, such as currency risk and country risk. The country risk and currency risk are as elaborated below:

CURRENCY RISK - Where a percentage of the value of the Fund is invested in foreign currency or assets denominated in a foreign currency, the Fund may be exposed to currency risk. Fluctuation in foreign exchange rates will affect the value of the Fund's foreign investments when converted into local currency and subsequently the value of investments of the unit holders of the Fund ("Unit Holder(s)"). This risk can be mitigated by investing in a wide range of foreign currency denominated asset thus diversifying the risk of single currency exposure. Hedging may be applied to mitigate the currency risk, if necessary.

COUNTRY RISK - In addition to currency risk, the Fund is also subject to country risk. The value of the assets of the Fund may also be affected by the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund may invest. Further, when investing in foreign markets, there are countries which may require prior approvals before investments can take place. For example, if and when the Fund invests in countries such as China, Taiwan, South Korea, India and Vietnam, such countries require the application of an investment license or registration of an investor code before any investment can be made in these countries. As such, if investments in such countries are undertaken, there may be a risk that such registration or licence may be revoked or not renewed by the relevant authority and the Fund's investment in these countries may be affected. The effect on the Fund's investments will depend on the regulatory requirements of the respective countries. For example, if a foreign market requires the Fund to obtain an investment licence which is subject to renewal and if such investment licence is not renewed in a timely manner, this may result in the Fund's investment account in that country being frozen by the regulator resulting in investment activities for the Fund in that country being suspended. To mitigate this, the Manager will monitor closely the adherence of investment regulatory requirements in such countries. Furthermore, share investments are susceptible to the movements of share prices which can rise or fall for a number of reasons such as industry trends, economic factors, changes in a company's operations, management and financial performance as well as market perception of that particular company. Other risks associated with investments in equities and equity related securities (i.e. warrants) are as elaborated below:

MARKET RISK - Market risk is a risk that arises when the prices of investments in the marketplace are affected by circumstances such as political or economic events. These circumstances, which may be a local or global event can affect the markets where the Fund is invested in and subsequently the value of the Fund's investments.

PARTICULAR SECURITY RISK - The fluctuation in the performance of each individual security that the Fund invests in will affect the price of the units of the Fund. Not all companies issuing these securities are successful. The success or failure of the companies will cause its securities value to rise or fall. Valued collectively, the performance of individual securities comprising the Fund's portfolio will cause the unit price of the Fund to rise or fall accordingly.

EQUITY RELATED SECURITIES RISK - The Fund may also invest in equity related securities such as warrants. As warrants are linked to the particular equity securities from which they are derived, the warrants inherit the risks linked to that underlying equity such as market risk, currency risk, country risk, industry risk and liquidity risk. A movement in the prices of the underlying equity securities of the warrants will generally result in a larger movement in the prices of the warrants, thus, the higher volatility of investments in warrants. In the event of a decline in the market, warrants can lose a substantial amount of their values, far more than equity securities and vice versa. Warrants also have a limited life and if they are not exercised at the maturity, they will expire and become worthless causing the value of the Fund's investments to fall. Like any other investment, the fall in the value of the Fund's investments will ultimately lower the NAV.

VALUATIONS AND EXITING FROM INVESTMENT

VALUATION OF ASSETS

The Fund must be valued at least once every Business Day. However, certain foreign markets in which the Fund may invest in have different time zones from that of Malaysia. Accordingly, the valuation of the Fund for a Business Day will be conducted before 5:00 p.m. on the following day in which the Manager is open for business, when the closing prices of the foreign markets for that Business Day would be available. As such, the daily price of the Fund for a particular Business Day will not be published in the major newspapers on the next day but will instead be published the next following day (i.e. the price will be two (2) days old). This will be specifically indicated in the major newspapers. Investors may however obtain the most current computed price by contacting the Manager directly or visiting our website, www.rhbgroup.com.

EXITING FROM THIS INVESTMENT

Units of the Fund can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered office or any of its branch offices, or to any of its authorised sales agents or participating IUTAs before their respective cut-off times. The redemption monies will be paid within ten (10) days after receipt by the Manager of the request to repurchase. For EPF Unit Holders, the redemption monies will be remitted to EPF by crediting into the members' provident account. For partial redemption, the balance of units of the Fund held after the redemption must be at least one hundred (100) units or such other lower quantity as the Manager may from time to time decide (the "minimum investment balance"). There are no restrictions on the number of units a Unit Holder can redeem out of his investments or the frequency of redemptions in a year. However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than the minimum investment balance.
