PRODUCT SUITABILITY

This Fund is suitable for investors who:

- wish to participate in the potential and investment opportunities of the Japan and Asian economies;
- wish to invest in companies which possess entrepreneurial characteristics; and
- are willing to accept high risk in their investments in order to achieve capital growth in the long term*.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

The Fund aims to achieve long term* capital appreciation through investments in securities of companies that possess entrepreneurial characteristics as determined by the Manager. *Note: "long term" in this context refers to a period of between 5 - 7 years.

INVESTMENT STRATEGY

This Fund seeks to achieve its objective through investments in a portfolio of securities issued by companies listed in Japan, and other Asian countries such as Hong Kong, China, South Korea, Taiwan, India, Indonesia, Thailand, Malaysia, Singapore and Philippines. The Fund's portfolio will consist of at least 50% of investments in securities of companies listed in Japan. The Manager will identify a universe of companies that the Manager believes to possess entrepreneurial management characteristics. The Manager regards stock selection as the source of investment returns that contributes to the outperformance of the Fund's returns against its benchmark and will make its investment decisions based on the "bottom-up approach" emphasizing research and analysis on each individual company. The Fund's investments in such companies are not industry or sector specific. This would accord the Fund a range of investment opportunities identified by the Manager as having entrepreneurial features based on company fundamentals. The Fund will invest in securities of companies which have entrepreneurial characteristics as determined by the Manager. In making such a determination, the Manager will look at the companies which have family involvement with at least 5% equity ownership by the family and corporate governance. For its qualitative analysis of a company, the Manager will focus on the management's display of leadership qualities and initiatives. The Manager will evaluate the management's capability of the company in terms of its pursuance of long term (generally refers to 5 to 7 years) shareholders' returns, consistency of management philosophy and timely and swift decision making. The Manager will in its quantitative screenings, look at factors such as the company's valuation, the company's growth potential, the company's financial soundness and the company's financial indicators such as liquidity and credit criteria.

The Fund's portfolio will be structured as follows:

70% to 98% of Net Asset Value ("NAV") - Investments in securities of companies that are listed on the stock exchanges of Japan and other Asian markets.

2% to 5% of NAV - Investments in liquid assets including money market instruments and deposits.

Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities. The risk management strategies and techniques employed by the Manager include diversification of the Fund's investments in terms of its exposure to various industries, sectors and asset classes/ type of investments (i.e. equity and money market instruments). Financial derivatives may also be used for hedging purposes where appropriate. Generally, the assets of the Fund will be invested over a medium to long term period** with disposal of the investments when necessary to control risk as well as to optimize capital gains. This is especially so when the full growth potential of an investment is deemed to have been reduced over a prolonged rise in equity value and other available equity investments with entrepreneurial characteristics may present cheaper valuations and better performance potential. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission. Adherence to the permitted investments and restrictions also helps the Manager to risk-manage the Fund's portfolio in terms of diversification. Moreover, the Manager in making its investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the deed of the Fund.

** medium to long term period here refers to a period of between 3 to 7 years.

For investments in Japan and other Asian countries, the Manager in managing the principal risks such as country risk and currency risk will always take into consideration its evaluation of the historical developments and its prior experience in such countries. Investments in Japan and other Asian countries will be actively managed with constant review of the economic and political developments of the countries in which the Fund is invested in. The Manager has engaged an investment adviser, Tokio Marine Asset Management International Pte Ltd, who will provide stock recommendations in relation to the Fund's investments in companies in Japan. Investments will ultimately be made based on risk-reward profiles. The Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse economic, political or any other market conditions. In such circumstances, the Manager may reallocate up to 100% of the Fund's equity investments into other asset classes such as fixed income instruments, money market instruments and deposits, which are defensive in nature.

BENCHMARK

With effect from 6 October 2017, the Fund's performance benchmark was changed to the Tokyo Stock Price Index (TOPIX). The benchmark chosen best represents the Fund's investments in terms of geographic location. Note: Prior to 6 October 2017, the Fund's performance benchmark was MSCI AC Asia Index (MXAS Index) (RM).

DISTRIBUTION

DISTRIBUTION POLICY - Consistent with the Fund's objective which aims to achieve capital growth over the long term, distributions will therefore be of secondary importance. Distributions, if any, after deduction of taxation and expenses will be reinvested.

DISTRIBUTION MODE - Distribution, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units based on the NAV per unit as at the first Business Day when units are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter.

KEY RISKS

PARTICULAR SECURITY RISK - The fluctuation in the performance of any equity in which the Fund invests in will affect the price of units. Not all companies issuing such equities are successful. The success or failure of the companies will cause the value of its equity to rise or fall. Valued collectively, the performance of individual equity comprising the Fund's portfolio will cause the unit price to rise or fall accordingly.

REGIONAL RISK - As this Fund's investments will focus on equities issued by companies listed in Asian countries, it may be subject to a higher level of risk than an equities portfolio which is not restricted to a particular geographical region / market. Thus, there is a risk that the Fund will perform poorly during an economic downturn or in the event of adverse news affecting the said region / market.

CURRENCY RISK - The Fund is exposed to currency risk. Fluctuation in foreign exchange rates will affect the value of the Fund's foreign investments when converted into the base currency of the Fund i.e. RM and subsequently the value of investments of unit holders of the Fund ("Unit Holder(s)").

COUNTRY RISK - In addition to currency risk, the Fund is also subject to country risk, for example the value of the assets of the Fund may be affected by the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund may invest in. Further, there are countries which may require prior approvals before investments can be made in such countries. For example, if and when the Fund invests in countries such as China, Taiwan, South Korea and India, such countries require the application of an investment licence or registration of an investor code before investments can be made in these countries. As such, if investments in such countries are undertaken, there may be a risk that such registration or licence may be revoked or not renewed by the relevant authority and the Fund's investments in these countries may be affected. The effect on the Fund's investments will depend on the regulatory requirements of the respective countries. For example, if a country requires the Fund to obtain an investment licence which is subject to renewal and if such investment licence is not renewed in a timely manner, this may result in the Fund's investment account in that country being frozen by the regulator resulting in investment activities for the Fund in that country being suspended. To mitigate this, the Manager will monitor closely the adherence of investment regulatory requirements in such countries.

VALUATIONS AND EXITING FROM INVESTMENT

VALUATION OF ASSETS

The Fund must be valued at least once every Business Day. However, certain foreign markets in which the Fund may invest in have different time zones from that of Malaysia. Accordingly, the valuation of the Fund for a Business Day will be conducted by 5.00 p.m. on the following day in which the Manager is open for business, when the closing price of the foreign markets for that Business Day should be available. As such, the daily price of the Fund for a particular Business Day will not be published in the major newspapers on the next day but will instead be published the next following day (i.e. the price will be two (2) days old). This will be specifically indicated in the major newspapers. Investors may obtain the most current computed price by contacting the Manager directly or by visiting our website, www.rhbgroup.com.

EXITING FROM THIS INVESTMENT

Units of the Fund can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered/principal office or any of its branch offices, or to any of its authorized sales agents or participating IUTAs before their respective cut-off times. For partial redemption, the balance of units after the redemption must be at least one hundred (100) units or such other lower quantity as the Manager may from time to time decide (the "minimum investment balance"). There are no restrictions on the number of units a Unit Holder can redeem out of his investments or the frequency of redemptions in a year. However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than the minimum investment balance. The redemption monies will be paid within ten (10) days after receipt by the Manager of the request to repurchase. For EPF Unit Holders, the repurchase proceeds will be remitted to EPF by crediting into the members' provident account.
