PRODUCT SUITABILITY

This Fund is suitable for investors who:

- (i) have a moderate risk appetite;
- (ii) seek returns from the income distributed and/or capital appreciation from a global Shariah-compliant fixed income instruments portfolio;
- (iii) have a medium to long term* investment horizon.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

The aim of the Fund is to provide income[^] and medium to long-term* capital growth by investing into global sukuk.

Note: [^]The income is in the form of units. *"medium to long term" in this context refers to a period of between 3 – 7 years.

INVESTMENT STRATEGY

In managing the Fund, the Manager will actively seek out global Shariah-compliant fixed income instruments such as sukuk, Islamic commercial papers, Islamic bankers' acceptances and Islamic notes that are able to offer attractive yields (i.e. yields, net of the Fund's expenses that are greater than the Fund's benchmark) and/or capital appreciation. These are Shariah-compliant fixed income instruments issued by corporations, financial institutions, supra-nationals, governments and their agencies globally. The Fund's investments may also include Islamic money market instruments and placements of cash in any Islamic deposits or Islamic investment accounts with any licensed financial institution, which are not embedded with or linked to financial derivative instruments ("Placements of Cash").

The Manager will invest in a portfolio of global Shariah-compliant fixed income instruments, with at least 80% of Net Asset Value ("NAV") in sukuk to lock-in the yield. The Manager may trade the Shariah-compliant fixed income instruments as and when opportunities arise and/or to risk manage the credit/default risk of the Shariah-compliant fixed income instruments' issuers or in response to external adverse events affecting any of the Shariah-compliant fixed income instruments in the Fund's portfolio.

This Fund's portfolio will be structured as follows:

90% to 100% of NAV - Investments in global Shariah-compliant fixed income instruments of which at least 80% of NAV in sukuk.

Up to 10% of NAV - Investments in Shariah-compliant liquid assets including Islamic money market instruments and Placements of Cash.

Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities.

The Fund will be managed with a focus on providing a yield at an acceptable risk level. The Manager aims to create a portfolio comprising Shariah-compliant fixed income instruments denominated in any currency. These can be Shariah-compliant fixed income instruments issued by corporations, financial institutions, supra-nationals, governments and their agencies globally. Shariah-compliant fixed income instruments that are issued by Malaysian corporations or financial institutions shall carry a rating of at least A3 at the point of purchase by RAM or its equivalent rating by a reputable rating establishment. Foreign Shariah-compliant fixed income instruments shall carry a rating of BB- or higher at the point of purchase by S&P Global Ratings ("S&P") or its equivalent rating by a reputable rating establishment. Shariah-compliant fixed

income instruments issued by supra-nationals, governments and their agencies need not be rated. However, the Fund will only invest in unrated Shariah-compliant fixed income instruments issued by supra-nationals, governments and their agencies if these instruments are determined by the Manager to be of comparable quality to Shariah-compliant fixed income instruments with a minimum rating of A3 by RAM or BB- by S&P.

In managing the portfolio, should a Shariah-compliant fixed income instrument be downgraded below the above stated ratings by the respective rating agencies, the Manager will as soon as reasonably practicable dispose this Shariah-compliant fixed income instrument. When the Manager disposes a Shariah-compliant fixed income instrument (whether in the ordinary course of managing this Fund or as a result of downgrading of a Shariah-compliant fixed income instrument), the proceeds will be used to invest in other Shariah-compliant fixed income instruments in accordance with the stated objective, strategy, restrictions and limits.

The Manager may take temporary defensive positions that may be inconsistent with the Fund's investment strategy in response to adverse economic, political or any market conditions. In such circumstances, the Fund may hold up to 100% of its assets in Shariah-compliant liquid assets as a defensive strategy. Other risk management strategies and techniques employed by the Manager include diversification of the Fund's investments in terms of its exposure to various industries, sectors and countries. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission. Adherence to these permitted investments and restrictions helps the Manager to risk-manage the Fund's portfolio in terms of its diversification. Moreover, the Manager in making its investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the deed of the Fund.

BENCHMARK

Maybank Islamic Berhad's 12-months Islamic Fixed Deposit-i.

DISTRIBUTION

DISTRIBUTION POLICY - The Fund will declare distributions, if any, to unit holders of the Fund ("Unit Holder(s)") depending on the level of income generated at each relevant period. Distribution, if any, after deduction of taxation and expenses (i.e. net distribution) is declared annually.

DISTRIBUTION MODE - Distributions, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units based on the NAV per unit as at the second Business Day when units are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter.

KEY RISKS

CREDIT / DEFAULT RISK - This risk refers to the creditworthiness of the issuers of Shariah-compliant fixed income instruments and the expected ability of the issuers to make timely payment of profit and/or principal. Shariah-compliant fixed income instruments are subject to both actual and perceived measures of creditworthiness. The downgrading of a rated Shariah-compliant fixed income instrument or adverse publicity and investor perception (whether in relation to the Shariah-compliant fixed income instrument itself or the issuer of the Shariah-compliant fixed income instrument) could decrease the value and liquidity of the Shariah-compliant fixed income instrument, particularly in a thinly traded market. An economic recession may adversely affect an issuer's financial condition and the market value of Shariah-compliant fixed income instruments issued by such an entity. The issuer's ability to service its payment obligations may be adversely affected by specific issuer developments, or the issuer's inability to meet specific projected business forecasts. All these factors may impact the value of the Fund or result in the Fund experiencing losses.

CURRENCY RISK - As the Fund may invest 90% to 100% of its NAV in global Shariah-compliant fixed income instruments denominated in any currency, the Fund is therefore subject to currency risk. Fluctuation in foreign exchange rates will affect the value of the Fund's foreign investments when converted into local currency and subsequently the value of Unit Holders' investments. The Fund may participate in Shariah-compliant currency hedging instruments to mitigate the currency risk, whenever necessary.

INTEREST RATE RISK - Interest rate is a general indicator that will have an impact on the management of a fund regardless whether it is a Shariah-compliant fund or otherwise. It does not in any way suggest that the Fund will invest in fixed income instruments which are Shariah non-compliant. Thus, interest rate changes would affect the performance of the Fund's portfolio of Shariah-compliant fixed income instruments. In the event of rising interest rates, prices of such affected Shariah-compliant fixed income instruments will generally decrease and vice versa. Meanwhile Shariah-compliant fixed income instruments with longer tenures and lower profit rates are more sensitive to interest rate changes. This risk will be mitigated via the management of the duration structure of the portfolio of Shariah-compliant fixed income instruments for the Fund.

COUNTRY RISK - In addition to currency risk, the Fund is also subject to country risk, for example the value of the assets of the Fund may be affected by the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund may invest in. Further, when investing in foreign markets, there are countries which may require prior approvals before investments can take place. For example, if and when the Fund invests in countries that require the application of an investment licence or registration of an investor code before any investment can be made in these countries. As such, if investments in such countries are undertaken, there may be a risk that such registration or licence may be revoked or not renewed by the relevant authority and the Fund's investment in these countries may be affected. The effect on the Fund's investments will depend on the regulatory requirements of the respective countries. For example, if a foreign market requires the Fund to obtain an investment licence which is subject to renewal and if such investment licence is not renewed in a timely manner, this may result in the Fund's investment account in that country to be frozen by the regulator resulting in investment activities for the Fund in that country to be suspended. To mitigate this risk, the Manager will monitor closely the adherence of investment regulatory requirements in such countries.

INFLATION RISK - Inflation is defined as increase of price level of goods and services and is commonly reported using the consumer price index as a measure. Inflation is one of the major risks to investors and results in uncertainty over the future value of the investments. Inflation reduces the purchasing power of money. In an inflationary environment, Shariah-compliant fixed income instruments are exposed to higher inflation risks than equities due to its fixed returns nature as compared to equities where returns are variable. As the Fund primarily invests in Shariah-compliant fixed income instruments where the returns are fixed, inflation will have an impact of reducing the fixed income real return (return of fixed income instrument less inflation rate) and correspondingly the Fund's real return.

RECLASSIFICATION OF SHARIAH STATUS RISK - This risk refers to the risk that the currently held Shariah-compliant fixed income instruments invested by the Fund may be declared as Shariah non-compliant by the relevant authority. In the event the sukuk and Islamic money market instruments held by the Fund are declared as Shariah non-compliant by Shariah Adviser of the Fund, the instruments will be disposed in accordance with rules and decision by the Shariah Adviser.

VALUATIONS AND EXITING FROM INVESTMENT

VALUATION OF ASSETS

The assets of the Fund must be valued at least once every Business Day, except during the Fund's initial offer period. As certain foreign markets in which the Fund may invest in have different time zones from that of Malaysia, the valuation of the Fund for a Business Day will be conducted by 5:00 p.m. (or such other time as may be determined by the Manager from time to time) on the following day in which the Manager is open for business.

Accordingly, the price of the Fund for a particular Business Day will not be published in the major newspapers on the next day but will instead be published the next following day (i.e. price will be two (2) days old). This will be specifically indicated in the major newspapers.

Investors may obtain the most current computed price by contacting the Manager directly at 03-9205 8000.

EXITING FROM THIS INVESTMENT

During the Fund's initial offer period, the Repurchase Price is fixed at the initial offer price of the respective Class during the Fund's initial offer period of the respective Class. After the Fund's initial offer period, the Repurchase Price shall be the NAV per unit of the respective Class as at the next valuation point of the Fund's relevant Business Day after the request for units is received by the Manager ("forward pricing"). The Manager does not charge any repurchase charge for this Fund.

For partial redemption, the balance of units after the redemption must be at least one hundred (100) units or such other quantity as the Manager may from time to time decide (the "minimum investment balance"). There are no restrictions on the number of units a Unit Holder can redeem out of the Unit Holder's investments or the frequency of redemptions in a year. However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than the minimum investment balance.

Units can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered/principal office or any of its branches, or to any of its participating IUTAs and any other authorized distributors before their respective cut-off times. All redemption requests will be processed in accordance with the redemption conditions for the Fund. The redemption monies will be paid within ten (10) days after receipt by the Manager of the request to repurchase.
