### PRODUCT SUITABILITY

This Fund is suitable for investors who: (i) want to have a balanced portfolio that provides both income\* and capital growth, and at the same time complies with the principles of Shariah; and (ii) are willing to accept moderate risk in their investments.

### KEY PRODUCT FEATURES

#### INVESTMENT OBJECTIVE

The Fund aims to provide regular income\* and capital growth over the medium to long-term\*\* from a diversified portfolio of Shariah-compliant investments.

\* Income is in the form of units. Please refer to the Fund’s distribution mode.

\*\* “medium to long-term” in this context refers to a period of 3 years or more.

#### INVESTMENT STRATEGY

This Fund seeks to achieve its investment objective through a diversified portfolio of Shariah-compliant investments comprising Shariah-compliant equities and non-equity Shariah-compliant investments, which are defensive in nature comprising sukuk, Islamic money market instruments and Islamic deposits with financial institutions (“Non-Equity Shariah-Compliant Investments”). Investments in Shariah-compliant equities and Non-Equity Shariah-Compliant Investments may also be made via Islamic collective investment schemes. The Fund will invest at least 40% and up to 60% of the Fund’s Net Asset Value (“NAV”) in Shariah-compliant equities and at least 40% and up to 60% of the Fund’s NAV in Non-Equity Shariah-Compliant Investments. Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities. However, when deemed appropriate and for the benefit of the Fund, the Manager, may take temporary defensive positions in dealing with adverse market, economic, political and other conditions. In such circumstances, the Manager may reallocate the Fund’s Shariah-compliant equities investments into other investments which are defensive in nature such as sukuk, Islamic money market instruments and non-equity Islamic collective investment schemes or just make placements in Islamic deposits with any financial institutions. In its reallocation, the level of Shariah-compliant equities investments would not fall below 20% of the NAV. The Fund’s investments will comprise of both local and foreign Shariah-compliant investments. The Fund may invest up to 100% of its NAV in securities of foreign markets within the Asia Pacific region such as China, Hong Kong, India, Indonesia, Korea, Philippines, Singapore, Taiwan, Thailand, Australia, New Zealand, Japan and such other countries which are deemed appropriate by the Manager. The investment portfolio of the Fund shall comprise securities of companies listed on Bursa Malaysia, which have been classified as Shariah-compliant by SACSC. For securities which are not reviewed by SACSC, the Shariah Adviser takes into account the parameters of FTSE Shariah methodology in determining whether the securities are Shariah-compliant for investment by the Fund<sup>#</sup>. The Fund’s investments in Shariah-compliant equities comprise of equity and equity related securities of companies listed on the local and/or foreign markets which, in the Manager’s opinion, will have good growth potential and/or the ability to provide good dividend yield over a long term period. In seeking investments in companies of good growth potential, the Fund will look to companies with sales or earnings growth that are stronger than the industry average and/or the country’s Gross Domestic Product (GDP) growth, whereas “good dividend yield” refers to yield that is above the average industry dividend yield in the country of investment, and “long term” refers to a period of between 5 - 7 years. The Fund’s investments in sukuk may comprise of sukuk issued by corporations, financial institutions, supra-nationals, local or foreign governments and their agencies. Sukuk issued by Malaysian incorporated companies must carry a rating of at least BBB at the point of purchase by RAM Rating Services Berhad or its equivalent rating by any other reputable rating establishment. Foreign sukuk issued by corporations and financial institutions must carry a rating of BB or higher at the point of purchase by Standard & Poor’s or its equivalent rating by any other reputable rating establishment whereas sukuk issued by supra-nationals,

governments and their agencies need not be rated. The Fund may also purchase sukuk which are not rated from countries which do not require mandatory ratings for such issuance. Such investments would therefore be selected based on the fundamentals of the issuer. The Fund's investments in Islamic money market instruments may comprise of Islamic money market instruments issued by the Government, financial institutions and Malaysian incorporated companies which amongst others comprise of Government Investment Issues (GI), Islamic Accepted Bills, Bank Negara Monetary Notes-i, Islamic Negotiable Instruments, Cagamas Sukuk and other Islamic papers. Islamic money market instruments issued by the Government need not be rated whereas Islamic money market instruments issued by financial institutions and Malaysian incorporated companies are those issued by such financial institutions and companies which carry an issuer rating of at least P3 by RAM Rating Services Berhad or its equivalent rating by any other reputable rating establishment at the point of purchase. Placements of Islamic deposits with any financial institution are placements such as in General Investment Account (GIA) and the Fund's investments of Islamic collective investment schemes will be those which are consistent with the underlying investments of the Fund. The Manager may also participate in Islamic financial derivatives, when appropriate, but the Fund's participation in Islamic financial derivatives is only for hedging purposes.

*\* Effective from 3 December 2017, the investment portfolio of the Fund shall comprise securities of companies listed on Bursa Malaysia, which have been classified as Shariah-compliant by SACSC. For securities which are not reviewed by SACSC, the Shariah Adviser takes into account the parameters of FTSE Shariah methodology in determining whether the securities are Shariah-compliant for investment by the Fund. Prior to 3 December 2017, both the local and foreign investments of the Fund in equity will be subjected to a Shariah screening process where the Shariah Adviser will adopt a combination of screening methodologies issued by SACSC, Otoritas Jasa Keuangan/Financial Services Authority (OJK), Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI) and Dow Jones Islamic Market Index Shariah Supervisory Board (DJIMISSB). SACSC is the ultimate authority advising the SC on Shariah matters pertaining to the Islamic Capital Market of Malaysia. OJK is the regulatory authority for the Indonesia capital markets. AAOIFI and DJIMISSB screening methodologies are commonly accepted for equity investments in foreign markets.*

#### BENCHMARK

Composite Benchmark comprising 50% RAM QuantShop GII (medium term) Index; and 50% FTSE Shariah Developed Asia Pacific. Following the change in Shariah screening methodology of the Fund from a combination of screening methodologies to a single FTSE Shariah screening methodology effective from 3 December 2017, the benchmark of the Fund will also be changed accordingly. Effective from 3 December 2017, the performance of this Fund is benchmarked against a composite benchmark comprising 50% RAM QuantShop GII (medium term) Index and 50% FTSE Shariah Developed Asia Pacific. Prior to 3 December 2017, the performance of this Fund is benchmarked against a composite benchmark comprising 50% RAM QuantShop GII (medium term) Index and 50% Dow Jones Islamic Market Asia Pacific Index.

#### DISTRIBUTION

**DISTRIBUTION POLICY** - Subject to the availability of income, the Fund will declare distributions annually.

**DISTRIBUTION MODE** - Distributions, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units based on the NAV per unit of the respective Class as at the first Business Day when units are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter.

#### KEY RISKS

**EQUITY RISK** - The performance of the equities held by the Fund is also dependent on company specific factors like the company's business situation. If the company-specific factors deteriorate, the price of the specific equity may drop significantly and permanently. Such event could possibly occur even in a positive equity market trend. The risk will be mitigated via portfolio diversification of the Fund's investments in terms of its exposure to equity from various industries, sectors and countries. In addition, where necessary, exposure to a particular equity will also be reduced in the event of an anticipated weakness in that particular equity.

**CURRENCY RISK** - This risk is associated with investments that are quoted in foreign currency denomination. When a security is denominated in a foreign currency which fluctuates unfavourably against Ringgit Malaysia, the investment in the Fund may face currency loss in addition to the capital gains or losses. This may lead to a lower NAV. In addition, an investor investing into the USD Class may also be subject to further currency risk as fluctuation between USD and Ringgit Malaysia may impact the value of the Fund's NAV per unit quoted in USD.

**COUNTRY RISK** - The Fund will be investing in foreign markets. The foreign investments portion of the Fund may be affected by risks specific to the country that the Fund invests in. Such risks include changes in the country's economic fundamentals, social and political stability, currency movements and foreign investments policies. These factors may impact the prices of the securities that the Fund invests in and ultimately lower the NAV. Such risk can be diversified by investing in different countries. Further, when investing in foreign markets, there are countries which may require prior approvals before an investment can take place. For example, if and when the Fund invests in countries such as China, Taiwan, Korea, India and Vietnam, such countries require the prior application or registration of an investment licence or investor code before any investment can be made in these countries. As such, if investments in such countries are undertaken, there may be a risk that such registration or license may be revoked or not renewed by the relevant authority and the Fund's investments in these countries may be affected. The effect on the Fund's investments will depend on the regulatory requirements of the respective countries. For example, if a foreign market requires the Fund to obtain an investment licence which is subject to renewal and if such investment licence is not renewed in a timely manner, this may result in the Fund's investment account in that country being frozen by the regulator resulting in investment activities for the Fund in that country being suspended. To mitigate this, the Manager will monitor closely the adherence of investment regulatory requirements in such countries.

**INTEREST RATE RISK** - This risk refers to the effect of interest rate changes on the price for sukuk. In the event of rising interest rates, price for sukuk will generally decrease and vice versa. Therefore, the NAV may also tend to fall when interest rates rise or are expected to rise. However, investors should be aware that should the Fund hold a sukuk till maturity, such price fluctuations would dissipate as it approaches maturity, and thus the NAV shall not be affected at maturity. Meanwhile, sukuk with longer maturities and lower profit rates are more sensitive to interest rate changes. In order to mitigate interest rates exposure of the Fund, the Manager will manage the duration of the portfolio via shorter or longer tenured sukuk depending on the view of the future interest rate trend of the Manager, which is based on its continuous fundamental research and analysis.

*Interest rate is a general indicator that will have an impact on the management of a fund regardless of whether it is a Shariah-compliant fund or otherwise. It does not in any way suggest that the Fund will invest in securities or instruments, which are Shariah non-compliant. All investments carried out for the Fund are in accordance with the requirements of the Shariah.*

**LIQUIDITY RISK** - Liquidity risk exists when a particular security is difficult to sell. This can occur when trading volume for the security is low or when there is a lack of demand for the security. Should a security become illiquid, it might not be sold or the price at which it is sold is at a discount to its perceived fair value, i.e. the price that the security would hold under normal market conditions. Thus, the value of the Fund's investments would fall and subsequently the value of investments of the unit holders of the Fund ("Unit Holder(s)") would be reduced.

**REGULATORY RISK** - Any changes in national policies and regulations may have an effect on the capital markets in which the Fund is investing. If this occurs there is a possibility that the value of Unit Holders' investments may be adversely affected.

**CREDIT DOWNGRADE AND CREDIT / DEFAULT RISK** - This refers to the creditworthiness of the issuers of sukuk and the expected ability of the issuers to make timely payment of profit and/or principal. Sukuk are subject to both actual and perceived measures of creditworthiness. The downgrading of a rated sukuk or adverse publicity and investor perception (whether in relation to the sukuk itself or the issuer of the sukuk) may decrease the value and liquidity of the sukuk, particularly in a thinly traded market. An adverse economic condition may adversely affect an issuer's financial condition and the market value of sukuk issued by such an entity. The issuer's ability to service its payment obligations may be adversely affected by specific issuer developments, or the issuer's inability to meet specific projected business forecasts. All this may impact the value of the Fund or result in the Fund experiencing losses. Ultimately, this may result in Unit Holders suffering a loss.

Note: The Fund will not, at the point of purchase, invest in sukuk issued by Malaysian incorporated companies that are rated lower than BBB by RAM Rating Services Berhad or its equivalent rating by any other reputable rating establishment. For investments in sukuk outside of Malaysia, the Fund will not invest in sukuk that are rated lower than BB by Standard & Poor's or its equivalent rating by any other reputable rating establishments at the point of purchase.

**RECLASSIFICATION OF SHARIAH STATUS RISK** - This risk refers to the risk that the currently held Shariah-compliant equities in the Fund may be reclassified to Shariah non-compliant in the periodic review of the equities by the SACSC, the Shariah Adviser or the Shariah boards of the relevant Islamic indices. If this occurs, the Manager will take the necessary steps to dispose of such equities.

**MARKET RISK IN EMERGING AND LESS DEVELOPED MARKETS** - The economic and political conditions in emerging and less developed markets differ from those in developed markets and offer less social, political and economic stability as compared to developed markets. Other risks in developing and emerging markets that can adversely impact the Fund may include:

- investment and repatriation restrictions
- the potential for unusual volatility in emerging and less developed markets is higher as compared to more industrialised nations
- limited information to the investors and less stringent disclosure requirements
- shallow and substantially smaller liquid securities markets than in more industrialised nations resulting in illiquid securities markets
- certain local tax law considerations that may negatively impact the Fund's investment
- limited regulation of the securities markets
- the possibility of limited legal recourse for the Fund and the custodial and/or the settlement systems may not be fully developed

These risks are likely to exist to a greater or lesser degree in some of the markets that the Fund may invest in.

**UNRATED SECURITIES RISK** - The Fund may invest into unrated securities from countries where there is no mandatory requirement for rating of securities. An investment in unrated securities is generally a risk for the Fund because the Manager may have limited access to timely information about such unrated securities for the Manager to conduct periodic monitoring of the Fund's investments.

**RISK OF USE OF RATING AGENCIES** - Credit ratings of investments of the Fund represent the rating agencies' opinion regarding the credit quality of the investment or the issuer and are not a guarantee of the quality of the investment. Rating methodologies generally rely on historical data, which may not be predictive of future trends. Also, adjustments to credit ratings in response to subsequent change of circumstances may take time. There is no uniform credit rating methodology between rating agencies and therefore the credit rating methodology of the Malaysian rating agencies (i.e. RAM Rating Services Berhad and Malaysian Rating Corporation Berhad) may differ with the credit rating methodology of international credit rating agencies.

## VALUATIONS AND EXITING FROM INVESTMENT

### VALUATION OF ASSETS

The assets of the Fund must be valued at least once every Business Day. As the Fund invests in foreign markets, which may have different time zones from that of Malaysia, the valuation of the Fund for a Business Day will be conducted by 2.30 p.m. (or such other time as may be determined by the Manager from time to time) on the following day in which the Manager is open for business. As such, the daily price of the Fund for a particular Business Day will not be published in the major newspapers on the next day but will instead be published the next following day (i.e. the price will be two (2) days old). This will be specifically indicated in the major newspapers. Investors may however obtain the most current computed price by contacting the Manager directly or visiting our website, [www.rhbgroup.com](http://www.rhbgroup.com).

### EXITING FROM THIS INVESTMENT

Units can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered/principal office or any of its branch offices, or to any of its authorized sales agents or to any of its participating IUTAs or any other authorized distributors on any day other than Saturdays, Sundays and public holidays before their respective cut-off times. All redemption requests will be processed in accordance with the redemption conditions for the Fund. For partial redemption, the minimum redemption amount of units is 1,000 units and the balance of units after the redemption must be at least 900 units (the "minimum investment balance"). However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than the minimum investment balance. The redemption monies will be paid within ten (10) days after receipt by the Manager of the request to repurchase. For EPF Unit Holders, the repurchase proceeds will be remitted to EPF by crediting into the members' provident account.
