PRODUCT HIGHLIGHTS SHEET

This Product Highlights Sheet only highlights the key features and risks of RHB Money Market Fund. Investors are advised to request, read and understand the Fund's prevailing prospectus and its supplementary(ies) (if any) before deciding to invest.

Name of Fund	RHB Money Market Fund ("Fund").	Fund Category	Money market fund.
Manager	RHB Asset Management Sdn Bhd.	Launch Date	20 January 2006.
Trustee	HSBC (Malaysia) Trustee Berhad.	Financial Year End	31 December.

PRODUCT SUITABILITY

This Fund is suitable for investors who:

- (i) require a high level of liquidity;
- (ii) are conservative and seek capital preservation;
- (iii) seek reasonable returns that commensurate with the low risks; and
- (iv) prefer a short-term investment horizon.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

This Fund aims to provide investors with a high level of liquidity[^] whilst providing reasonable returns by investing in low risk investments.

[^]Note: Redemption monies of the Fund will generally be paid the day following the next business day (a working day when the Manager is open for business) after receipt by the Manager of request to repurchase.

INVESTMENT STRATEGY

This Fund seeks to achieve its objective through investments in a portfolio of money market instruments and other short term debentures and placements of deposits with financial institutions. Investment in debentures issued by financial institutions or private entities must at the point of purchase, carry a credit rating of at least A/P3 by RAM Rating Services Berhad or its equivalent rating by any other rating establishment. Should the ratings thereafter be downgraded below the said minimum credit rating, such papers shall be disposed off within a reasonable time frame taking into consideration prevailing market conditions and factors.

Thus, this Fund's portfolio will be structured as follows:

90% - 100% of Net Asset Value ("NAV") - Investments in debentures, money market instruments and placements of deposits ("Permitted Investments") with financial institutions which have a remaining maturity period of not more than 365 days.

0% - 10% of NAV - Investments in debentures, money market instruments and placements of deposits with financial institutions which have a remaining maturity period of more than 365 days but less than 732 days.

Although the Fund is actively managed, its fund management strategy will depend on the interest rate environment and the anticipated redemption requests by unit holders of the Fund ("Unit Holder(s)"). Specific risks associated with such securities and investments are as elaborated in section 2.2.

For investments in foreign markets, the Manager in managing the principal risks such as country risk and currency risk will always take into consideration its evaluation of the historical developments and its prior experience in such markets. Such practice will be managed through active management and constant review of the economic and political developments of the countries invested. Investments will ultimately be made based on risk-reward.

The risk management strategies and techniques employed by the Manager include diversification of the Fund's investments in terms of its exposure to various industries, sectors, countries and asset classes and/or type of investments (i.e. bonds and money market instruments). Financial derivatives may also be used for hedging purposes where appropriate. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission. Adherence to the permitted investments and restrictions also helps the Manager to risk-manage the Fund's portfolio in terms of diversification. Moreover, the Manager in making its investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the Deed.

DISTRIBUTION

DISTRIBUTION POLICY - Consistent with the Fund's objective to provide reasonable returns, the Fund will distribute a substantial portion of

its returns to Unit Holders. Distributions, if any, after deduction of taxation, if any, and expenses, are generally declared annually and will be reinvested.

DISTRIBUTION MODE - Distribution, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units of the Fund based on the NAV per unit as at the first Business Day** when units in the Fund are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter.

**Note: Business Day refers to a day in which Bursa Malaysia is open for trading.

KEY RISKS

INTEREST RATE RISK - Interest rate risk is crucial in this Fund since debentures, money market instruments and deposits portfolio management depends on forecasting interest rate movements. Interest rate changes could affect the Fund's portfolio adversely if the strategy taken by the fund manager differs from the actual outlook of the interest rates market. With respect to debentures, prices of debentures generally move in opposite direction with interest rates. When interest rates rise, prices of debentures will generally fall. This rise in interest rate would cause the investor to face the risk of capital loss. But when interest rates fall, prices of debentures would generally increase, therefore, investors would see capital gains. In order to mitigate interest rates exposure of the Fund, the Manager will manage the duration of the portfolio via shorter or longer tenured debentures, money market instruments and deposits depending on the view of the future interest rate trend of the Manager, which is based on its continuous fundamental research and analysis.

CREDIT / DEFAULT RISK - This refers to the creditworthiness of the debenture issuer and its expected ability to make coupon payments and/or repay or pay the principal in a timely manner. Default happens when the issuer is not able to make timely coupon or profit payments and/or repay or pay the principal in a timely manner thus lowering the value of the Fund's investments and subsequently the value of Unit Holders' investments.

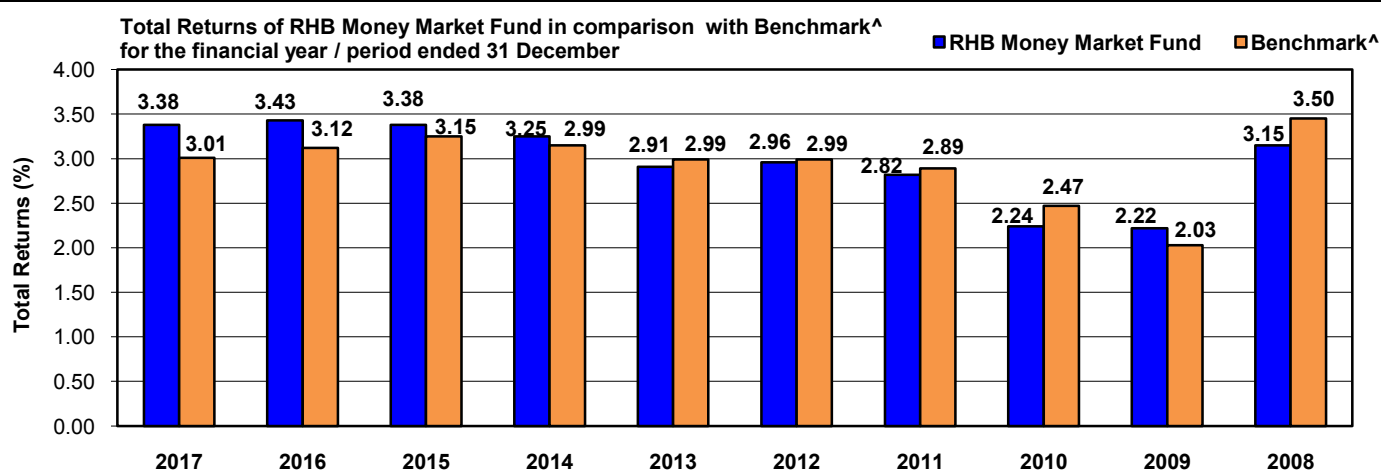

INFLATION / PURCHASING POWER RISK - Inflation can be defined as increases of the price level of goods and services and is commonly reported using the consumer price index as a measure. Inflation is one of the major risks to investors and results in uncertainty over the future value of the investments. Inflation reduces purchasing power of money. In an inflationary environment, fixed income securities are exposed to higher inflation risks than equities due to its fixed returns nature as compared to equities whose returns are variable.

VALUATIONS AND EXITING FROM INVESTMENT

VALUATION OF ASSETS

The Fund must be valued at least once every Business Day**. However, certain foreign markets in which the Fund may invest in have different time zones from that of Malaysia. The valuation of the Fund for a Business Day** will be conducted before 5:00 p.m. on the following day in which the Manager is open for business, when the closing prices of the foreign markets for that Business Day** would be available. As such, the daily price of the Fund for a particular Business Day** will not be published in the major newspapers on the next day but will instead be published the next following day (i.e. price will be two (2) days old). This will be specifically indicated in the major newspapers. Investors may obtain the most current computed price by contacting the Manager directly or visiting our website, www.rhbgroup.com.

**Note: Business Day refers to a day in which Bursa Malaysia is open for trading.

EXITING FROM THIS INVESTMENT

Units of the Fund can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered/principal office or any of its branch offices, or to any of its authorised sales agents or participating Institutional Unit Trust Advisers before their respective cut-off times. The redemption monies will be paid the day following the next business day* after receipt by the Manager of request to repurchase. In the event of any technical difficulties beyond the Manager's control or should the redemption request result in the sale of assets which cannot be liquidated at an appropriate price or on adequate terms and is as such not in the interest of existing Unit Holders, redemption monies may be paid at any time not later than ten (10) days after receipt by the Manager of the request to repurchase units or such other period as may be permitted by the relevant authorities from time to time.

*These are the working days when the Manager is open for business.

Redemptions for the Fund should be of at least five thousand (5,000) units or such other lower quantity as the Manager may from time to time decide. There are no restrictions on the frequency of redemptions in a year. However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than five thousand (5,000) units or such other lower quantity as the Manager may from time to time decide (the minimum investment balance).
