PRODUCT HIGHLIGHTS SHEET

RHB EMERGING OPPORTUNITY UNIT TRUST

Name of Fund	RHB Emerging Opportunity Unit Trust ("Fund").
Manager	RHB Asset Management Sdn Bhd.
Trustee	HSBC (Malaysia)Trustee Berhad.
Fund Category	Equity fund.
Commencement Date	18 May 2004.
Financial Year End	31 March.

PRODUCT SUITABILITY

This Fund is suitable for fairly aggressive investors who are willing to accept higher risk in order to obtain higher growth of their capital over a long term* period.

*Note: "long term" in this context refers to a period of between 5 – 7 years.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

This Fund aims to achieve superior long term* capital appreciation through investments in companies with high growth potential.

*Note: "long term" in this context refers to a period of between 5 -7 years.

INVESTMENT STRATEGY

This Fund seeks to achieve its investment objective by structuring a portfolio as follows:

95% - 98 % of Net Asset Value

- Investments in securities of companies with market capitalisation of not more than RM1.50 billion.

2% - 5% of Net Asset Value

- Investments in liquid assets including bonds, money market instruments and deposits with financial institutions.

The above mentioned restriction on market capitalisation is determined at the point of purchase. Subject to the range stipulated above, the asset allocation will be reviewed from time to time depending on the judgement of the Manager as to the general market and economic conditions. Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities.

For investments in foreign markets, the Manager in managing the principal risks such as country risk and currency risk will always take into consideration its evaluation of the historical developments and its prior experience in such markets. Such practice will be managed through active management and constant review of the economic and political developments of the countries invested. Investments will ultimately be made based on risk-reward.

The risk management strategies and techniques employed by the Manager include diversification of this Fund's investments in terms of its exposure to various industries, sectors and asset classes and/or type of investments (i.e. equity, fixed income, money market instruments). Financial derivatives may also be used for hedging purposes where appropriate. Generally, the assets of the Fund will be invested over a medium to long term period with disposal of the investments when necessary to control risk as well as to optimise capital gains. This is especially so when the full growth potential of an investment is deemed to have been reduced over a prolonged rise in equity value and other available equity investments may present cheaper valuations and potential higher returns. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission. Adherence to the permitted investments and restrictions also helps the Manager to risk-manage the Fund's portfolio in terms of diversification. Moreover, the Manager in making its investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the Deed.

The Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse economic, political or any other market conditions. In such circumstances, the Manager may reallocate the Fund's equity investments into other asset classes such as fixed income securities, money market instruments and deposits with any financial institutions, which are defensive in nature. These are deposits that are not embedded with or linked to financial derivative instruments (structured deposits) and (where applicable) these are current accounts, short term money market deposits and short term deposits with financial institutions. In its reallocation, the level of equity investments would normally not be below 20% of the Net Asset Value.

BENCHMARK

FBM Small Cap Index.

DISTRIBUTION

Distribution Policy

Consistent with the Fund's objective to achieve capital growth, distributions will therefore be of secondary importance. Distributions, if any, after deduction of taxation and expenses, are generally declared annually and will be reinvested.

Distribution Mode	Distribution, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units of the Fund based on the Net Asset Value per unit as at the first Business Day when units in the Fund are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter.
-------------------	--

KEY RISKS

As the Fund invests only in small to medium size companies, it may therefore be subject to a higher level of risk than a portfolio diversifying its holdings to include larger sized companies. Moreover, the acquisition or disposal of securities of small to medium size companies may require a longer time period as there are generally less ready buyers or sellers as compared to the securities of larger, more established companies. Hence there is a risk that securities may not be sold at or near fair value depending on the volume traded on the market. Furthermore, as the size of the Fund grows larger, there may be insufficient securities of small to medium sized companies as a larger number of these securities is required to be acquired or disposed before there is any impact on the Fund. Other risks associated with investments in equities are as elaborated below:

Market risk	Market risk is a risk that arises when the prices of investments in the marketplace are affected by circumstances such as political or economic events. These circumstances, which may be a local or global event can affect the markets where the Fund is invested in or global markets and subsequently the value of the Fund's investments.
-------------	--

Particular security risk	The fluctuation in the performance of each individual security that the Fund invests in will affect the price of the units of the Fund. Not all companies issuing these securities are successful. The success or failure of the companies will cause its securities value to rise or fall. Valued collectively, the performance of individual securities will cause the Fund's unit price to rise or fall accordingly.
--------------------------	---

As this Fund may invest up to 30% of its Net Asset Value in foreign markets, it may be subject to further risks, such as currency risk and country risk, when compared to a portfolio which concentrates its holdings in a single market or economy.

FUND PERFORMANCE

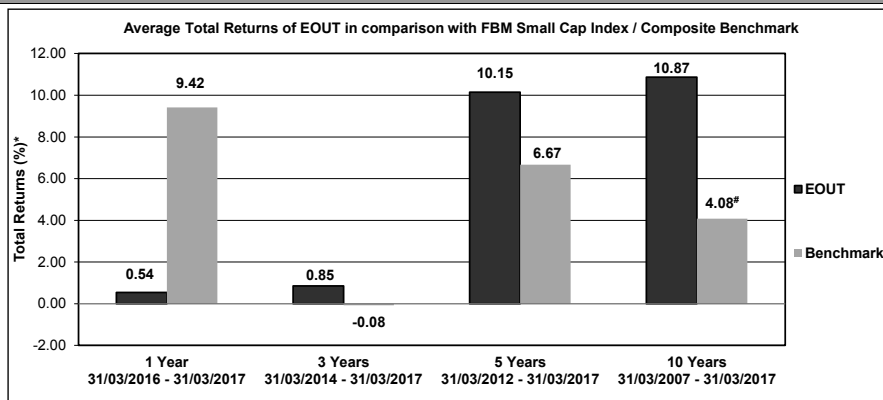

The Fund has been in operation since 18 May 2004 and its financial year end was previously 31 May. Effective year 2008, the Fund's financial year end has been changed to 31 March. For ease of comparison, the Fund's performance has been re-computed based on the new financial year end.

Following the cessation of the KLSE EMAS Index and the KLSE Second Board Index in the year 2006 and the year 2007 respectively, the Fund's composite benchmark was replaced with the FTSE Bursa Malaysia Emas Index and the FBM Second Board Index and the Fund's composite benchmark performance has been adjusted to reflect the new benchmark (where data is available) for ease of comparison.

On 3 August 2009, BMSB imposed a new framework which combined the Second Board with the Main Board to form a new unified board, the "Main Market". Consequently, the asset allocation strategy of the Fund was changed. In addition, the Fund's composite benchmark of 70% FBM Second Board Index and 30% FTSE Bursa Malaysia Emas Index was changed to FBM Small Cap Index to best reflect the Fund's underlying investments, which is used in all performance reporting.

The Fund's performances are as follows:

AVERAGE TOTAL RETURNS OF THE FUND

*The abovementioned Fund performance is computed on Net Asset Value to Net Asset Value basis and has been adjusted to reflect distributions and unit splits, if any and are annualised. The abovementioned benchmark performances were computed based on the following composition (where applicable): 70% KLSE Second Board Index and 30% FTSE Bursa Malaysia Emas Index from 31 March 2006 – 31 October 2007; 70% FBM Second Board Index and 30% FTSE Bursa Malaysia Emas Index from 31 October 2007 – 31 July 2009; FBM Small Cap Index from 31 July 2009 – 31 March 2017.

The Fund recorded an annual return of 0.54% in the last financial year whilst the benchmark registered an annual gain of 9.42%. On a longer term, the Fund has also consistently outperformed its benchmark in the 3, 5 and 10 years period. Thus, the Fund has achieved its objective of providing investors with superior long term capital appreciation.

ANNUAL TOTAL RETURNS OF THE FUND

* The abovementioned Fund performance is computed on Net Asset Value to Net Asset Value basis and has been adjusted to reflect distributions and unit splits, if any. The abovementioned composite benchmark performance was computed based on the following: 70% KLSE Second Board Index and 30% FTSE Bursa Malaysia Emas Index from 31 March 2007 – 31 October 2007; 70% FBM Second Board Index and 30% FTSE Bursa Malaysia Emas Index from 31 October 2007 – 31 July 2009; FBM Small Cap Index from 31 July 2009 onwards.

Except for the year 2010, 2014 and 2017, the Fund has consistently outperformed its benchmark each year even though it recorded negative returns in 2009. The poor performance in 2009 was due to the difficult market conditions then prevailing culminating from the global financial crisis. Despite the under performance in 2010 against its benchmark, the Fund still gave a commendable return of 29.73%. For the last financial year, the Fund registered a return of 0.54% whilst its benchmark registered gain of 9.42%.

PORTFOLIO TURNOVER RATIO

Portfolio Turnover Ratio ("PTR")	Financial Year Ended 31 March		
	2017	2016	2015
	0.34 times	1.17 times	0.90 times

The PTR for the financial year was lower compared with the previous financial year as there were lesser investment activities during the financial year.

VALUATIONS AND EXITING FROM INVESTMENT

VALUATION OF ASSETS

The Fund must be valued at least once every Business Day. However, certain foreign markets in which the Fund may invest in have different time zones from that of Malaysia.

The valuation of the Fund for a Business Day will be conducted before 5:00 p.m. on the following day in which the Manager is open for business, when the closing prices of the foreign markets for that Business Day would be available.

As such, the daily price of the Fund for a particular Business Day will not be published in the major newspapers on the next day but will instead be published the next following day (i.e. price will be two (2) days old). This will be specifically indicated in the major newspapers.

Investors may obtain the most current computed price by contacting the Manager directly or visiting our website, www.rhbgroup.com.

EXITING FROM THIS INVESTMENT

Units of the Fund can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered/principal office or any of its branch offices, or to any of its participating IUTAs or to any other authorised distributors before their respective cut-off times.

The redemption monies will be paid within ten (10) days after receipt by the Manager of the request to repurchase.

For partial redemption, the balance of units held after the redemption must be at least one hundred (100) units or such other lower quantity as the Manager may from time to time decide (the "minimum investment balance"). There are no restrictions on the number of units a Unit Holder can redeem out of his investments or the frequency of redemptions in a year. However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than the minimum investment balance.

For EPF Unit Holders, the repurchase proceeds will be remitted to KWSP by crediting into the members' provident account.
