PRODUCT HIGHLIGHTS SHEET

RHB KLCI TRACKER FUND

Name of Fund	RHB KLCI Tracker Fund ("Fund").
Manager	RHB Asset Management Sdn Bhd.
Trustee	HSBC (Malaysia) Trustee Berhad.
Fund Category	Equity / Index Tracking fund.
Commencement Date	3 April 2000.
Financial Year End	31 March.

PRODUCT SUITABILITY

This Fund is suitable for investors who seek equity market returns as measured by the benchmark FBM KLCI and prefer passive investment management. These investors are willing to accept high risk in their investments in order to obtain capital growth over a short to medium term* period.

*Note: "short to medium term" in this context refers to a period of between 1 - 3 years.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

This Fund aims to provide investment results that closely correspond to the performance of the Kuala Lumpur Composite Index or such other index as may be replaced by Bursa Malaysia Securities Berhad.

Note: Effective 6 July 2009, Bursa Malaysia Securities Berhad replaced the KLCI with the FBM KLCI.

INVESTMENT STRATEGY

This Fund seeks to achieve its investment objective by investing all or substantially all of the Fund's assets in the FBM KLCI component stocks in substantially the same weightings as they appear in the FBM KLCI.

The FBM KLCI is an index that provides a performance benchmark for the Malaysian equity market by reflecting the performance of listed companies that are representative of the major sectors in the Malaysian economy. The FBM KLCI is an index of the thirty (30) largest companies listed on the Main Market by full market capitalisation that meet the eligibility requirements of the FTSE Bursa Malaysia Ground Rules. The FBM KLCI index is calculated by FTSE based on its own specific calculation methodology and rules. Therefore, any error or non-adherence to these calculation methodology and rules may affect the accuracy and/or completeness of the FBM KLCI Index computation. Investors may obtain more information about the FBM KLCI's calculation methodology and rules from Bursa Malaysia's website: www.bursamalaysia.com.

Generally, the Fund will invest in all of the thirty (30) component stocks of the FBM KLCI. To the extent consistent with achieving its investment objective, the Fund may also participate in FBM KLCI futures. Although this Fund is passively managed, the investments in the Fund will be rebalanced from time to time to reflect any changes to the composition of or the weightings of shares in the FBM KLCI. Accordingly, a daily analysis of the portfolio is conducted to ensure that:

- Tracking errors are within expectations;
- Stocks continue to be within the perimeters of the FBM KLCI component stocks;
- Investment weightings are within the tolerance limit, otherwise rebalancing of the portfolio is required; and
- Cash is properly hedged.

This Fund seeks to achieve its investment objective by structuring a portfolio as follows:

90% - 99.5% of Net Asset Value

- Investments in the FBM KLCI component stocks.

0% - 10% of Net Asset Value

- Participation in financial derivatives.

0.5% - 10% of Net Asset Value

- Investments in liquid assets including money market instruments and deposits with any financial institutions.

Tracking errors against the benchmark FBM KLCI may occur due to the necessity of the Fund to set aside some liquid funds which would otherwise be invested to achieve 100% weightage. Another contributing factor to the tracking errors are the fees and expenses payable by the Fund and transaction costs incurred in rebalancing the portfolio. As such, the risk management strategies and techniques employed by the Manager include the use of financial derivatives to replicate the benchmark FBM KLCI and the constant rebalancing of the portfolio. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission. Moreover, the Manager in making its investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the Deed.

BENCHMARK

FBM KLCI.

DISTRIBUTION

Distribution Policy	Consistent with the Fund's objective to achieve capital growth, distributions will therefore be of secondary importance. Distributions, if any, after deduction of taxation and expenses, are generally declared annually and will be reinvested.
Distribution Mode	Distribution, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units of the Fund based on the Net Asset Value per unit as at the first Business Day when units in the Fund are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter.

KEY RISKS

As the Fund tracks the performance of the FBM KLCI, it may be subject to the Bursa Malaysia market volatility and therefore pose a higher level of risk than a portfolio diversifying its holdings across several markets and economies. Changes in the Net Asset Value are unlikely to exactly replicate changes in the FBM KLCI. This amongst others, is due to the fees and expenses payable by the Fund and transaction costs incurred in adjusting the composition of or the weighting of the Fund's investments because of changes in the FBM KLCI. Other risks associated with investments in equities are as elaborated below:

Market risk	Market risk is a risk that arises when the prices of investments in the marketplace are affected by circumstances such as political or economic events. These circumstances, which may be a local or global event can affect the markets where the Fund is invested in and subsequently the value of the Fund's investments.
Particular security risk	The fluctuation in the performance of each individual security that the Fund invests in will affect the price of the units of the Fund. Not all companies issuing these securities are successful. The success or failure of the companies will cause its securities value to rise or fall. Valued collectively, the performance of individual securities will cause the Fund's unit price to rise or fall accordingly.

In addition, as the Manager will participate in financial derivatives for the purpose of achieving the Fund's investment objective, there are certain tracking risks involved. Such risks may include an imperfect correlation between price movements of the financial derivatives with price movements of the Fund's investments.

Further, the risk of loss in trading financial derivatives is potentially great, due to both low margin deposits required, and the extremely high degree of leverage involved in futures derivatives pricing. As a result, a relatively small price movement in a financial derivative may result in immediate and substantial loss (or gain) to the Fund.

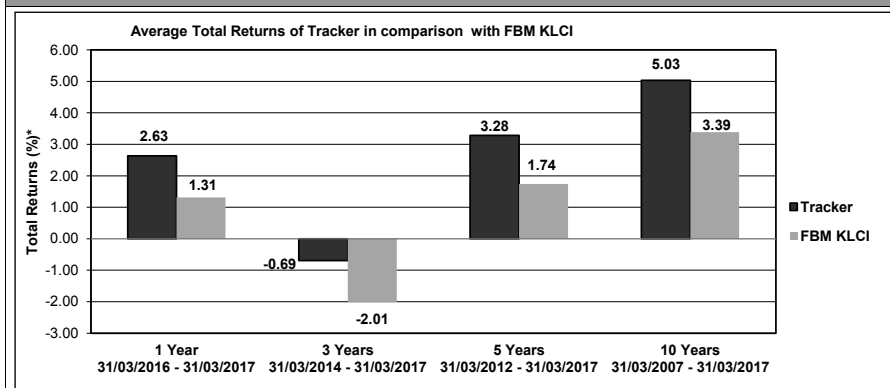

FUND PERFORMANCE

The Fund has been in operation since 3 April 2000 and its financial year end is on 31 March.

Following the replacement of the KLCI by BMSB with the FBM KLCI effective 6 July 2009, the Fund is now tracking the performance of the FBM KLCI. Accordingly, the Fund's performance is now benchmarked against the FBM KLCI instead of the KLCI. The changeover, however, does not affect the historical performance of the benchmark as the past index of FBM KLCI are the same as that of the KLCI. This new benchmark is used in all performance reporting.

The Fund's performances are as follows:

AVERAGE TOTAL RETURNS OF THE FUND

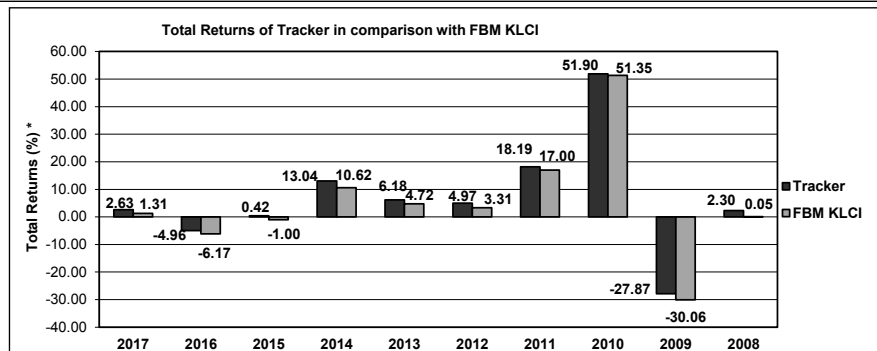

Source: Lipper IM.

*The abovementioned Fund performance is computed on Net Asset Value to Net Asset Value basis and has been adjusted to reflect distributions and unit splits, if any and are annualised.

For the financial year under review, the Fund registered a gain of 2.63% whilst its benchmark recorded a gain of 1.31%. The Fund has met its investment objective to provide investment results that closely correspond to the performance of the FBM KLCI during the year.

VALUATIONS AND EXITING FROM INVESTMENT

VALUATION OF ASSETS

The Fund must be valued at least once every Business Day. The valuation of the Fund for a Business Day will be conducted at the close of Bursa Malaysia for that Business Day. Thus, the daily price of the Fund for a particular Business Day will be published in the major newspapers on the next day.

Investors may obtain the most current computed price by contacting the Manager directly or visiting our website, www.rhbgroup.com.

EXITING FROM THIS INVESTMENT

Units of the Fund can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered/principal office or any of its branch offices, or to any of its participating IUTAs or to any other authorised distributors before their respective cut-off times.

The redemption monies will be paid within ten (10) days after receipt by the Manager of the request to repurchase.

For partial redemption, the balance of units held after the redemption must be at least one hundred (100) units or such other lower quantity as the Manager may from time to time decide (the "minimum investment balance"). There are no restrictions on the number of units a Unit Holder can redeem out of his investments or the frequency of redemptions in a year. However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than the minimum investment balance. For EPF Unit Holders, the repurchase proceeds will be remitted to KWSP by crediting into the members' provident account.
