PRODUCT HIGHLIGHTS SHEET

This Product Highlights Sheet only highlights the key features and risks of RHB Thematic Growth Fund. Investors are advised to request, read and understand the Fund's prevailing prospectus and its supplementary(ies) (if any) before deciding to invest.

Name of Fund	RHB Thematic Growth Fund ("Fund").	Fund Category	Mixed asset fund.
Manager	RHB Asset Management Sdn Bhd.	Launch Date	26 September 2007.
Trustee	HSBC (Malaysia) Trustee Berhad.	Financial Year End	31 December.

PRODUCT SUITABILITY

This Fund is suitable for investors who:

- (i) seek participation in Malaysian companies that will benefit from evolving domestic and/or global trends;
- (ii) seek a dynamic and flexible investment mandate;
- (iii) prefer capital growth rather than income over a medium to long term* period; and
- (iv) are willing to accept moderate risk in their investments.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

This Fund aims to provide investors with medium to long term* capital appreciation through investments in securities of Malaysian companies that will benefit from evolving domestic and/or global trends.

*Note: "medium to long term" in this context refers to a period of between 3 - 7 years.

INVESTMENT STRATEGY

This Fund will focus on a minimum of 3 themes from the evolving domestic and/or global trends identified by the Manager as having strong potential to outperform the benchmark return of 8.00% growth per annum in Net Asset Value ("NAV") of a unit. Hence, the name "Thematic Growth".

The Manager views Malaysia as dynamic, with a high-growth and rapidly expanding economy, undergoing long term structural changes. Depending on which stage of the economic cycle we are in, the Manager will look for the appropriate themes which the Manager will seek to take advantage of. For example, during periods of economic slowdown, the Manager will look for defensive themes such as high dividend yielding stocks and companies with sustainable earnings growth. Other themes would also include counter-cyclical sectors as well as mergers & acquisitions. Conversely, during economic up-cycles, the Manager will look for growth stocks, possibly in export oriented sectors (e.g., manufacturing, technology and electronics) as well as consumer discretionary like properties, automobiles and other luxury goods. The Manager's strategy is to identify the said themes in its early phase to capitalise on its growth. After identifying the most promising themes, the Manager will proceed to select companies with strong fundamentals and attractive valuations. Undervalued securities are uncovered through intensive and independent fundamental research.

Within a theme, the focus is generally on companies with sustainable business model, ability to expand locally and/or regionally, ability to deliver above average growth, consistently strong underlying profitability, reasonable valuations and strong balance sheet.

The Manager will rebalance the asset allocation and stock selection and reposition the Fund accordingly to reap the benefits of the change in market dynamics, economic cycle and specific factors influencing each sector.

This Fund's portfolio will be structured as follows:

Up to 98% of NAV - Investments in equity and equity-related securities of Malaysian companies that will benefit from evolving domestic and/or global trends.

2% - 100% of NAV - Investments in fixed income securities, money market instruments, cash and deposits with financial institutions.

Hence, the Fund will generally have an equity exposure of up to 98% of its NAV to generate returns to the Fund. However, the Manager may lower the equity exposure of the Fund in favour of fixed income securities such as government bonds and corporate debt securities which include money market instruments in order to help achieve the benchmark return and/or to help preserve capital[#].

[#]Note: Although the Fund aims to preserve its value, the Fund is not a capital guaranteed or a capital protected fund.

Accordingly, the Fund's exposure to fixed income securities may increase up to 100% of the NAV.

Although the Fund is actively managed, how active or the frequency of its trading strategy will depend on market opportunities.

The risk management strategies and techniques employed by the Manager include diversification of the Fund's investments in terms of its exposure to various industries, sectors and asset classes and/or type of investments (i.e. equity, fixed income securities and money market

instruments). Financial derivatives may also be used for hedging purposes where appropriate. Generally, the assets of the Fund will be invested over a medium to long term period with disposal of the investments when necessary to control risk as well as to optimise capital gains. This is especially so when the full growth potential of an investment is deemed to have been reduced over a prolonged rise in market value and other available investments may present attractive valuations and potential higher returns. The Fund also complies with the permitted investments and restrictions imposed by the Securities Commission. Adherence to the permitted investments and restrictions also helps the Manager to risk-manage the Fund's portfolio in terms of diversification. Moreover, the Manager in making its investment decisions shall at all times comply with the investment restrictions of the Fund and requirements as set out in the deed of the Fund.

BENCHMARK

8.00% growth per annum in NAV of a unit over the medium to long term.

This is not a guaranteed return and is only a measurement of the Fund's performance. The Fund may not achieve the aforesaid 8% per annum growth rate in any particular financial year but targets to achieve this growth over the medium to long term*.

*Note: "medium to long term" in this context refers to a period of between 3 - 7 years.

DISTRIBUTION

DISTRIBUTION POLICY - Consistent with the Fund's objective which aims to achieve medium to long term* capital appreciation, distributions will therefore be of secondary importance. Distributions, if any, after deduction of taxation and expenses will be reinvested.

DISTRIBUTION MODE - Distribution, if any, after deduction of taxation and expenses (i.e. net distribution), will be reinvested to purchase additional units of the Fund based on the NAV per unit as at the first Business Day** when units in the Fund are quoted ex-entitlement. Allotment of such units shall be within two (2) weeks thereafter.

**Note: Business Day refers to a day (other than Saturdays, Sundays and public holidays) in which Bursa Malaysia is open for trading.

KEY RISKS

As the Fund's dynamic mandate allows it to generally have an equity exposure of up to 98% of its NAV or an exposure to fixed income securities of up to 100% of its NAV, the risks peculiar to this Fund are:

MARKET RISK - Market risk is a risk that arises when the prices of investments in the marketplace are affected by circumstances such as political or economic events. These circumstances, which may be a local or global event can affect the markets where the Fund is invested in or global markets and subsequently the value of the Fund's investments.

PARTICULAR SECURITIES RISK - The fluctuation in the performance of each individual security that the Fund invests in will affect the price of the units of the Fund. Not all companies issuing these securities are successful. The success or failure of the companies will cause its securities value to rise or fall. Valued collectively, the performance of individual securities comprising the Fund's portfolio will cause the unit price of the Fund to rise or fall accordingly.

INTEREST RATE RISK - Prices of fixed income securities and debentures generally move in opposite direction with interest rates. When interest rates rise, prices of fixed income securities and debentures will generally fall. This rise in interest rates will cause the investor to face the risk of capital loss. However, when interest rates fall, prices of fixed income securities and debentures will generally increase, thus investors will see capital gains.

CREDIT / DEFAULT RISK - This refers to the creditworthiness of the fixed income securities and debentures issuer and its expected ability to repay debt. Default happens when the issuer is not able to make timely coupon payments and/or repay or pay the principal in a timely manner thus lowering the value of the Fund's investments and subsequently the value of the investments of unit holders of the Fund ("Unit Holder(s)").

VALUATIONS AND EXITING FROM INVESTMENT

VALUATION OF ASSETS

The Fund must be valued at least once every Business Day**. The valuation of the Fund for a Business Day** will be conducted at the close of Bursa Malaysia for that Business Day**. Thus, the daily price of the Fund for a particular Business Day** will be published in the major

newspapers on the next day. Investors may obtain the most current computed price by contacting the Manager directly or visiting our website, www.rhbgroup.com.

****Note:** Business Day refers to a day (other than Saturdays, Sundays and public holidays) in which Bursa Malaysia is open for trading.

EXITING FROM THIS INVESTMENT

Units of the Fund can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered office or any of its branch offices, or to any of its participating IUTAs or to any other authorised distributors before their respective cut-off times. The redemption monies will be paid within ten (10) days after receipt by the Manager of the request to repurchase. For partial redemption, the balance of units held after the redemption must be at least one hundred (100) units or such other lower quantity as the Manager may from time to time decide (the "minimum investment balance"). There are no restrictions on the number of units a Unit Holder can redeem out of his investments or the frequency of redemptions in a year. However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than the minimum investment balance. For EPF Unit Holders, the repurchase proceeds will be remitted to KWSP by crediting into the members' provident account.
