PRODUCT HIGHLIGHTS SHEET

RHB BOND FUND

Name of Fund	RHB Bond Fund.
Manager	RHB Asset Management Sdn Bhd.
Trustee	HSBC (Malaysia) Trustee Berhad.
Fund Category	Bond fund.
Commencement Date	10 October 1997.
Financial Year End	30 September.

PRODUCT SUITABILITY

This Fund is suitable for investors who:

- (i) are risk averse;
- (ii) want to protect the purchasing power of their wealth against inflation;
- (iii) want to enjoy a relatively more predictable income on a yearly basis; and
- (iv) want to diversify their overall investment portfolio by including bonds as an asset class.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

To provide investors with higher than average income returns compared to fixed deposits over the medium to long term through investments in bonds and other fixed income securities with minimum risk to capital invested.

INVESTMENT STRATEGY

This Fund seeks to achieve its investment objective by structuring a portfolio as follows:

- Up to 95% of NAV will be invested in bonds and other fixed income securities, of which at least 60% of NAV will be invested in bonds.
- Minimum of 5% of NAV will be invested in liquid assets.

Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities.

The Fund will invest in quality fixed income securities which carry a minimum long term credit rating of BBB and above assigned by RAM or its equivalent. To contain credit risk, the Manager will ensure that the diversification of credit rating (and duration standing) in the bond portfolio mitigate the overall risk position of the portfolio.

The Manager may also take temporary defensive measures that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse market conditions, economics, political or any other conditions which the Manager deem detrimental to the Fund. The defensive measures that the Manager may undertake are in no way to be deviated from the mandates or breaching any laws and regulations. The Fund's strategies in yield enhancement for the portfolio will also be balanced with other investment needs of the Fund, such as liquidity and risk management. On liquidity management, the Fund will maintain sufficient amount of portfolio in liquid bond to accommodate redemption. As for risk management, the portfolio duration is kept at optimal level where yield enhancement can be optimised on risk adjusted basis, and at the same time, balanced with the need for containing portfolio's volatility.

Hence, during the temporary defensive period, the Manager may choose to increase the asset allocation by allocating more investment into risk free investments which are money market instruments and deposit in adverse market condition.

BENCHMARK

Maybank's 12 months fixed deposit rate.

DISTRIBUTION

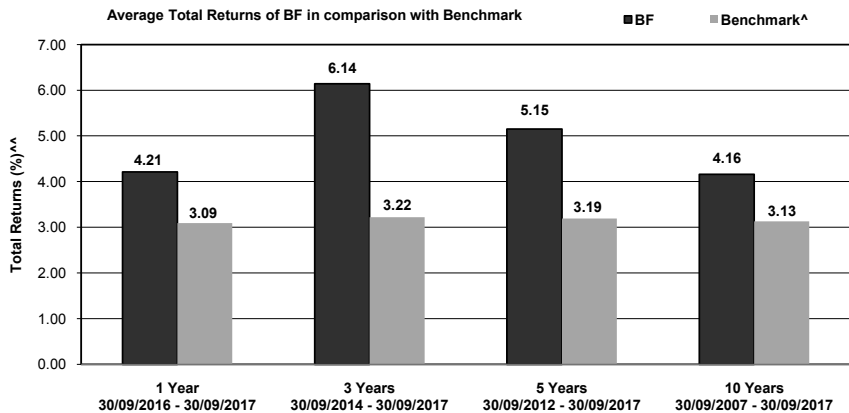

Distribution Policy	Income, if any, will be distributed during the financial year.
Distribution Mode	<p>Distribution (if any) which is less than or equal to the amount of RM300.00, will be automatically reinvested into the Fund based on the Net Asset Value per Unit seven (7) Business Days after the ex-dividend date. No Sales Charge or costs shall be incurred or payable by the Unit Holders for the reinvestment.</p> <p>Distribution (if any) which is more than the amount of RM300.00, will be automatically paid out to the Unit Holders via cheque, unless the Unit Holder specifically requests for the distribution to be reinvested into the Fund by selecting the appropriate option in the application form. Unit Holders who opt for their distribution to be reinvested into the Fund will have their distribution reinvested into the Fund based on the Net Asset Value per Unit seven (7) Business Days after the ex-dividend date. No Sales Charge or costs shall be incurred or payable by the Unit Holders for the reinvestment.</p> <p>In the absence of the Unit Holder's written instructions, income distribution from the Fund will be automatically paid out to the Unit Holders via cheque.</p> <p>A Unit Holder must notify the Manager in writing seven (7) Business Days prior to each date fixed for the distribution of any change in his distribution instructions.</p>

KEY RISKS

Interest rate risk	Generally, bond prices move in the opposite direction of interest rates; a rise in interest rates will generally cause a fall in bond prices and vice versa. The Fund will experience a capital loss or capital gain should the bond be sold before maturity. In order to mitigate interest rates exposure of the Fund, the Manager will manage the duration of the portfolio via shorter or longer tenured assets depending on the view of the future interest rate trend of the Manager, which is based on its continuous fundamental research and analysis.
Credit and Default risk	This refers to the likelihood that the company issuing the bonds and/or financial institution where liquid assets of the Fund are deposited may default. Securities are subject to varying degrees of credit risk, which are often reflected in credit ratings. Municipal bonds are subject to the risk that litigation, legislation or other political events, local business or economic conditions, or the bankruptcy of an issuer could have a significant effect on the issuer's ability to make payments of principal and/or interest. The Fund could lose money if the issuer or guarantor of a fixed income security, or the counterparty to a derivatives contract, repurchase agreement or a loan of portfolio securities or a financial institution, is unable or unwilling to make timely principal and/or interest payments, or to otherwise honour its obligations. Credit risk can be managed by performing continuous fundamental credit research and analysis to ascertain the creditworthiness of its issuer and/or financial institution. This risk refers to the possibility that the issuer of an instrument and/or financial institution will not be able to make timely payments of interest or principal repayment on the maturity date, where applicable. This may lead to a default in the payment of principal and interest and ultimately a reduction in the value of the Fund.
Liquidity risk	Liquidity risk exists when particular investments are difficult to sell, possibly preventing the Fund from selling such illiquid securities at a favourable price. The Fund's principal investment strategies that involve securities or securities with substantial market and/or credit risk tend to have greater exposure to liquidity risk. As part of its risk management, the Manager will attempt to manage the liquidity of the Fund through asset allocation and diversification strategies within the portfolio. The Manager will also conduct constant fundamental research and analysis to forecast future liquidity of its investments.
Issuer risk	The value of each individual fixed income securities that the Fund invests in may decline for a number of reasons which is directly related to the issuer, such as, the management performance, financial leverage and reduced demand for the issuer's goods or services. The Manager aims to reduce all these risks by using diversification that is expected to reduce the volatility as well as the risk for the Fund's portfolio.

VALUATIONS AND EXITING FROM INVESTMENT

VALUATION OF ASSETS

The Fund must be valued at least once every Business Day.

Accordingly, the valuation of the Fund for a Business Day will be conducted at the close of Bursa Malaysia for that Business Day. Thus, the daily price of the Fund for a particular Business Day will be published in the major newspapers on the next day.

Investors may obtain the most current computed price by contacting the Manager directly or visiting our website, www.rhbgroup.com.

EXITING FROM THIS INVESTMENT

Units of the Fund can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered/principal office or any of its branch offices, or to any of its participating Institutional Unit Trust Advisers (IUTAs) or to any other authorised distributors before their respective cut-off times.

The Manager does not impose any minimum amount for any repurchase transaction but subject to the minimum holding requirement.

There are no restrictions on the number of units of the Fund a Unit Holder can redeem out of his investments or the frequency of redemptions in a year. However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than one thousand (1,000) units or such other lower quantity as the Manager may from time to time decide (the "minimum investment balance"). For the avoidance of doubt, the Manager will deem an automatic request for a full repurchase of units to have been made by the Unit Holder should a request for partial redemption leave the balance of units held after the redemption less than the applicable minimum holding.

Unit Holders may receive the repurchase proceeds within ten (10) days from the date the Manager is in receipt of the duly completed repurchase forms.

For EPF Unit Holders, the repurchase proceeds will be remitted to EPF by crediting into the members' provident account.
