PRODUCT HIGHLIGHTS SHEET

RHB CAPITAL FUND

Name of Fund	RHB Capital Fund.
Manager	RHB Asset Management Sdn Bhd.
Trustee	Maybank Trustees Berhad.
Fund Category	Equity fund.
Commencement Date	12 April 1995.
Financial Year End	30 April.

PRODUCT SUITABILITY

This Fund is suitable for investors who:

- (i) want a professionally managed portfolio of shares and fixed income securities;
- (ii) have a medium to long term investment horizon of 3 to 5 years or more;
- (iii) want to achieve potential capital growth (accumulation) at an acceptable level of risk; and
- (iv) want to invest in shares but do not have the time to manage their own portfolio.

KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

To achieve long term growth through capital appreciation with all income including profits on realisation of investments being automatically reinvested for its compounding effect.

INVESTMENT STRATEGY

This Fund seeks to achieve its investment objective by structuring a portfolio as follows:

- Minimum of 60% and up to 95% of NAV will be invested in equities.
- Minimum of 5% of NAV will be invested in fixed income securities and/or liquid assets.

Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities.

The Fund seeks long term capital appreciation. To pursue this goal, the Fund invests primarily in Malaysian public listed companies with strong growth potential. The Manager utilises a strategy that seeks attractively priced companies in undervalued sectors, or in sectors that have strong upward stock price momentum which demonstrate strong increases in earnings per share and continue to strengthen their fundamental capabilities and competitive positions, amongst others.

The Manager uses fundamental valuation parameters to determine the relative value of the company compared to its peer universe. These numbers include price/earnings multiple of the company, earnings growth rates, relative price earnings to growth, cashflow, balance sheet strength, quality of management, relative positioning of the company in the industry in which it operates, return on equity, return on assets and return on investments, among others. Quarterly earnings expectations and results are carefully followed. Subject to the range stipulated above, and the Fund's asset allocation and stock selection could differ if any of the key macro and micro factors materially changes.

In addition to those described above, the Fund may invest in fixed income securities to preserve the value[#] of the Fund.

The Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy in attempting to respond to adverse economic, political or any other market conditions. In such circumstances, the Manager may reallocate up to 100% of the Fund's equity investments into other asset classes such as fixed income securities, money market instruments and deposits with financial institutions, which are defensive in nature. These are deposits that are not embedded with or linked to financial derivative instruments (structured deposits) and (where applicable) these are current accounts, short term money market deposits and short term deposits with financial institutions.

Note: [#]Although the Fund aims to preserve its value, the Fund is not a capital guaranteed fund or a capital protected fund.

KEY RISKS

Stock market risk	Securities may decline in value due to factors affecting securities markets generally or particular industries represented in the securities markets. The value of a security may decline due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investors' sentiment generally. They may also decline due to factors that affect a particular industry or industries, such as labour shortages or increased production costs and competitive conditions within an industry. Equity securities generally have greater price volatility than fixed income securities. The market price of securities owned by the Fund might go down or up, sometimes rapidly or unpredictably.
Liquidity risk	Liquidity risk exists when particular investments are difficult to sell, possibly preventing the Fund from selling such illiquid securities at a favourable price. The Fund's principal investment strategies that involve securities or securities with substantial market and/or credit risk tend to have greater exposure to liquidity risk. As part of its risk management, The Manager will attempt to manage the liquidity of the Fund through asset allocation and diversification strategies within the portfolio. The Manager will also conduct constant fundamental research and analysis to forecast future liquidity of its investments.
Individual stock risk	The performance of each individual stock that the Fund invests in is dependent upon the management quality of the particular company and its growth potential. Hence, this would have an impact on the Fund's prices and its dividend income. The Manager aims to reduce all these risks by using diversification that is expected to reduce the volatility as well as the risk for the Fund's portfolio. In addition, the Manager will also perform continuous fundamental research and analysis to aid its active asset allocation management especially in its stock selection process.
Issuer risk	The value of each individual fixed income securities that the Fund invests in may decline for a number of reasons which is directly related to the issuer, such as, the management performance, financial leverage and reduced demand for the issuer's goods or services. The Manager aims to reduce all these risks by using diversification that is expected to reduce the volatility as well as the risk for the Fund's portfolio.

FUND PERFORMANCE

AVERAGE TOTAL RETURNS OF THE FUND

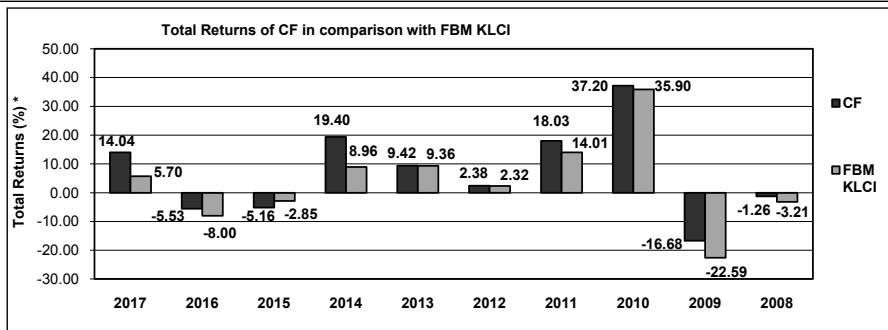

Source: Lipper IM.

* The abovementioned Fund performance is computed on Net Asset Value to Net Asset Value basis and has been adjusted to reflect distributions and unit splits, if any and are annualised.

Over the long term period of 10 years, the Fund recorded an annualised return of 6.17% as compared to the benchmark annualised return of 2.95%. Thus, in the longer term, the Fund has achieved its investment objective to provide investors with long term growth through capital appreciation.

ANNUAL TOTAL RETURNS OF THE FUND

Source: Lipper IM.

* The abovementioned Fund performance is computed on Net Asset Value to Net Asset Value basis and has been adjusted to reflect distributions and unit splits, if any.

For the latest financial year, the Fund registered a gain of 14.04% compared to its benchmark gain of 5.70%. The Fund's outperformance was mainly due to the Manager's stock selection and asset allocation strategy.

PORTFOLIO TURNOVER RATIO

Portfolio Turnover Ratio ("PTR")	Financial Year Ended 30 April		
	2017	2016	2015
	0.39 times	0.65 times	0.69 times

The PTR for the latest financial year was lower compared with the previous financial year due to decrease in investment activities during the latest financial year.

ASSET ALLOCATION

As at the latest financial year end (i.e. 30 April 2017), the Fund has invested 96.47% in equities and the balance of 3.53% was held in liquid assets and other net current liabilities.

VALUATIONS AND EXITING FROM INVESTMENT

VALUATION OF ASSETS

The Fund must be valued at least once every Business Day.

Accordingly, the valuation of the Fund for a Business Day will be conducted at the close of Bursa Malaysia for that Business Day. Thus, the daily price of the Fund for a particular Business Day will be published in the major newspapers on the next day.

Investors may obtain the most current computed price by contacting the Manager directly or visiting our website, www.rhbgroup.com.

EXITING FROM THIS INVESTMENT

Units of the Fund can be redeemed by forwarding the completed form of request to repurchase to the Manager's registered/principal office or any of its branch offices, or to any of its participating Institutional Unit Trust Advisers (IUTAs) or to any other authorised distributors before their respective cut-off times.

The Manager does not impose any minimum amount for any repurchase transaction but subject to the minimum holding requirement.

There are no restrictions on the number of units of the Fund a Unit Holder can redeem out of his investments or the frequency of redemptions in a year. However, the Manager shall not be bound to comply with any request for redemption of units if the balance of units held after the redemption is less than one thousand (1,000) units or such other lower quantity as the Manager may from time to time decide (the "minimum investment balance"). For the avoidance of doubt, the Manager will deem an automatic request for a full repurchase of units to have been made by the Unit Holder should a request for partial redemption leave the balance of units held after the redemption less than the applicable minimum holding.

Unit Holders may receive the repurchase proceeds within ten (10) days from the date the Manager is in receipt of the duly completed repurchase forms.

For EPF Unit Holders, the repurchase proceeds will be remitted to KWSP by crediting into the members' provident account.
