KEY PRODUCT FEATURES

INVESTMENT OBJECTIVE

The Fund aims to provide income and capital growth by investing in one (1) target fund i.e. Schroder International Selection Fund Emerging Multi-Asset Income.

INVESTMENT STRATEGY

The Fund will invest principally in one (1) of the sub-funds of the Schroder International Selection Fund*, that is, the USD AX distribution share class of the Target Fund.

* *Schroder International Selection Fund is an open-ended investment company organised as a "société anonyme" under the laws of the Grand Duchy of Luxembourg and qualified as a Société d'investissement à Capital Variable ("SICAV"). The Target Fund is managed by Schroder Investment Management (Luxembourg) S.A. and the fund management is delegated to Schroder Investment Management Limited (London, United Kingdom). Schroder Investment Management (Luxembourg) S.A. is regulated by Commission de Surveillance du Secteur Financier (Luxembourg Financial Sector Supervisory Authority) ("CSSF") under chapter 15 of the law on undertakings for collective investment dated 17 December 2010, as amended and the Target Fund is authorised in Luxembourg and regulated by the CSSF.*

The investment objective of the Target Fund is to provide a variable income distribution of 4% to 6% per annum and capital growth over a market cycle by investing in a diversified range of assets and markets worldwide. The Target Fund aims to provide a volatility (a measure of how much the Target Fund's returns may vary over a year) of between 8% to 16% per annum.

Although the Fund is passively managed, the investments in the Fund will be rebalanced from time to time to meet sale and redemption transactions. This is to enable proper and efficient management of the Fund.

The Manager does not adopt any temporary defensive positions for the Fund in response to adverse market, economic, political or any other condition as such defensive strategies are expected to be implemented at the Target Fund's level when deemed necessary by the Target Fund's manager. The Manager does not adopt any temporary defensive positions for the Fund as this will allow the Fund to best track the performance of the Target Fund. It also follows that if the Target Fund fails to adopt a successful defensive position in response to adverse market and economic positions, there is a risk that the Fund will mirror the Target Fund's negative performance, if any. Also, investors should note that at all times the Fund is always subject to currency risk.

This Fund is a feeder fund that invests at least 95% of Net Asset Value ("NAV") in the Target Fund. The risk management strategies and techniques employed will be at the Target Fund level.

Notwithstanding anything contained herein, the Manager may, in consultation with the Trustee and with the approval of the unit holders of the Fund ("Unit Holder(s)"), replace the Target Fund with another fund of a similar objective if, in the Manager's opinion, the Target Fund no longer meets the Fund's investment objective, or when acting in the interest of the Unit Holders.

When appropriate for RM class, the Manager may trade in financial derivatives, which include but is not limited to forwards and swaps, for the purpose of hedging the currency risk exposure (if any) of the RM class. The benefit of any upside of currency movement is limited when hedging the class exposure to foreign currency risk as the primary interest is to protect the value of the portfolio of the class.

UNIT HOLDERS ARE ADVISED TO READ AND UNDERSTAND THE TARGET FUND'S INVESTMENT OBJECTIVE, FOCUS AND APPROACH DISCLOSED IN THE FUND'S PREVAILING INFORMATION MEMORANDUM AND ITS SUPPLEMENTARY(IES) (IF ANY).

KEY RISKS

KEY RISKS OF THE FUND

MANAGEMENT RISK - As the Fund invests at least 95% of NAV in the Target Fund, it is subject to the management risk of the manager of the Target Fund. Poor management of the Target Fund by the Target Fund's manager will jeopardise the investments of the Fund in the Target Fund and in turn, the Unit Holders' investments through the risk of reduced returns and in some cases loss of capital invested in the Fund.

LIQUIDITY RISK - The Fund is also exposed to liquidity risk as there is no secondary market for the Target Fund. Investments in the Target Fund can only be liquidated with the manager of the Target Fund or its appointed agents.

COUNTRY RISK - As the Target Fund is domiciled in Luxembourg, the Target Fund is subject to country risk. The Fund's investments in the Target Fund may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls which may be imposed by the relevant authorities in Luxembourg. This in turn may cause the NAV to fall.

CURRENCY RISK - The impact of the exchange rate movement between the base currency of the Fund (i.e. USD) and the differing currency of a class (i.e. RM class) may result in a depreciation of the investor's holdings as expressed in the base currency of the Fund.

KEY RISKS OF THE TARGET FUND

- Capital risk due to distribution policy of Target Fund
- Capital risk due to negative yields
- China country risk
